WHEAT AND FEED GRAINS GENERALLY LOWER

Wheat and feed grains traded generally lower across the Nation during the week ended July 2. New crop harvest pressure for hard and soft red winter wheat with rapidly maturing feed grain crops furnished the weakening influence which was compounded by slow demand for both domestic use and for export. Farmer selling remained very light on all grains except soft red winter wheat which was traded freely thus far into the new crop. End of month export business was barely met by the slow selling of hard red winter wheat, corn and soybeans.

Kansas City hard red winter wheat dropped 9 cents on ordinary protein at \$3.08 and 10 cents for 13 percent protein at \$3.76 per bushel. Chicago soft red winter wheat declined 12 cents at \$2.90 and Toledo soft white wheat fell 13 cents at \$2.71 per bushel. Portland soft white wheat eased 3 cents lower at \$3.31, hard red winter ordinary traded 2 cents lower at \$3.33 and 14 percent dark northern spring sold 3 cents lower at \$4.69 per bushel.

Minneapolis spring wheat traded mixed but mostly higher as the new crop hard winter wheat has shown little protein thus far into the new crop. Dark northern spring ordinary moved unchanged to 1 cent lower at \$3.63 to \$3.74, 14 percent protein unchanged to 2 cents higher at \$4.20 to \$4.26 and hard amber durum medium milling quality up 5 cents at \$5.30 per bushel. Rye held at \$2.50 per bushel.

Corn markets declined under pressure of good new crop prospects in spite of light country selling. Chicago No. 2 yellow corn dropped 5-6 cents at \$2.82 to \$2.86 and Kansas City white corn fell 10 cents at \$2.90 per bushel. Chicago No. 2 extra heavy white oats fell 3 cents at \$1.58. Minneapolis best malting barley 70 percent or better plump held at \$3.70 to \$4.15 and feed grade advanced 15 cents at \$1.85 to \$1.90. Portland No. 2 Western barley traded 7 cents lower at \$2.26 per bushel.

Soybean markets declined as Texas harvest continues to supply much of the export needs and feeder interest was light. Kansas City No. 2 yellow sorghum fell 10-15 cents at \$4.40 and Texas High Plains sorghum moved steady to down 5 cents at \$4.60 per cwt.

Chicago No. 1 yellow soybeans went down 14 cents at \$5.08 and Illinois crusher point prices fell 12-13 cents at \$5.10 to \$5.16 per bushel. Minneapolis flaxseed moved up 40 cents to trade at \$7.75 per bushel and sunflower seed traded 50 cents higher at \$10.50 per hundred pounds for old crop and new crop at \$11.00 per cwt.

EXPORT INTEREST FIRMS GRAIN MARKETS

Wheat and all feed grains excepting oats turned stronger on export buying during the week ended July 10. Export firms bought grain fairly heavily as farmers turned sellers as cash markets advanced and speculative interest pushed grain futures markets sharply higher on all grain exchanges. Russia appeared the biggest buyer this week with other countries backing away from the advancing market. Good crop prospects encouraged farmer selling but failed to dim buying interest in the face of prospect selling fair amounts of wheat, corn and soybean to Russia where drought has cut crop prospects. Western feeders continued to use heavy amounts of wheat for feed.

Kansas City hard winter wheat moved 50 cents higher for ordinary protein at \$3.58 and 36 cents higher for 13 percent at 4.12 per bushel. Chicago No. 2 soft red winter went up 56 cents at \$3.46 in spite of heavy new crop selling and increased elevator stocks during the period. Toledo soft white wheat traded 53 cents higher at \$3.24. Portland soft white wheat moved up 40 cents at \$3.71 with hard winter ordinary protein up 46 cents at \$3.79 and dark northern spring 14 percent protein sold 31 cents higher at \$5.00 per bushel.

Minneapolis dark northern spring wheat ranged 20 to 21 cents higher with ordinary protein at \$3.83 to \$3.95, 14 percent at \$4.40 to \$4.46 and hard amber durum, medium milling quality advanced 30 cents at \$5.60 per bushel. Rye gained 15 cents at \$2.65.

Chicago No. 2 yellow corn sold 4 to 6 cents higher at \$2.86 to \$2.92 but Kansas City No. 2 white corn held at \$2.90 per bushel. Chicago heavy oats fell 7 cents at \$1.51 as buyers awaited nearby new crop supplies. Minneapolis but malting barley moved at unchanged to 10 cents higher prices at \$3.80 to \$4.15 and feed grade went up 5 to 10 cents at \$1.90 to \$2.00 per bushel. Stockton, California No. 2 western barley advanced 7 cents at \$2.52 to \$2.54.

Kansas City yellow sorghum traded 30 cents higher at \$4.70 per cwt as early harvest area of Texas neared the end. Los Angeles price went up 20 cents at \$5.70 to \$5.75 per cwt.

Soybean markets moved strongly higher on export soybean business and advancing markets for oil and meal. Chicago No. 1 yellow soybeans sold up 48 cents at \$5.56 and Illinois crushes point prices advanced 36 to 38 cents at \$5.48 to \$5.52 per bushel. Minneapolis flaxseed traded 50 cents higher at \$8.25 per bushel. New crop sunflower seed advanced 50 cents at \$11.50 per hundred pounds delivered Minneapolis or Duluth.

USSR GRAIN CROP ESTIMATE REVISED DOWNWARD:

The U.S. Department of Agriculture announced July 9 that its latest estimate of the 1975 total-grain crop in the Soviet Union is 195 million metric tons. This is the second reduction from the department's original preseason estimate of 210 million tons. A harvest of 195 million metric tons would be approximately equal to the 1974 crop.

As of June 9, the USDA estimate was reduced to 200 million tons, which included 95 million tons of wheat, 90 million tons of course grains, and 15 million tons of miscellaneous grains and pulses. The current estimate, which assumes average crop conditions for the balance of the season, includes 90 million tons of wheat, while estimates for other grains are unchanged from the early June estimate.

Unusually low rainfall and above normal temperatures have prevailed in recent months in several important producing areas, especially the Volga Region, the Southern Urals, and portions of Kazahastan. Latest weather and news reports indicate that these conditions persisted throughout the month of June and into the first days of July. In addition, the agricultural areas that had significantly below normal moisture supplies increased and moved eastward into the important spring wheat producing areas of Kazahastan.

The yields of Soviet winter grain crops, which account for about one-third of Soviet production, and which are already being harvested, are not especially large this year. Although winter kill was unusually low, and harvested area therefore significantly above that of recent years, yields in several important areas are known to have been well below last year. The 1974 total outturn of winter grains was about 62 million tons, and tentative estimates are for a crop of about the same quantity in 1975.

The weather during the next few weeks will be important in determining the final size of the spring grain crops, which account for over two-thirds of the Soviet grain production. Current forecasts however, indicate a possible continuation of somewhat unfavorable conditions.

A harvest of 195 million tons could be approximately the same as the 1974 crop but over 20 million tons below the 215.7 million tons planned for 1975. Barring some change in Soviet determination to meet plans for continuing growth of their feeding industry and animal product output, a 195 million ton crop could also be about 15 million tons below probable Soviet domestic utilization requirements for the 1975/76 season. Reserve stocks, if available, could meet some of this shortfall.

WHEAT AND FEED GRAIN MARKETS MOSTLY STRONGER

Wheat and feed grains traded mostly stronger across the Nation during the week ended July 17. Russia purchased over 3 million metric tons of U.S. wheat and around two million metric tons of wheat from Canada, according to trade reports. Traders had expected that Russia might also buy corn and soybeans. Speculation now is that Russia will wait until harvest time for their crops before making feed grain purchases. Texas sorghum harvest was delayed by rain and this market firmed. Corn and oats showed weak spots as crop prospects continue bright in spite of dry conditions over much of the country. Farmer selling has been carefully managed and continues on the light side.

Kansas City hard winter wheat gained strength from the Russian purchase of hard winter wheat and from the lack of widespread selling at the farm level. Ordinary wheat traded up 15 cents at \$3.73 with 13 percent protein up 4 cents at \$4.16 per bushel. Chicago soft red winter wheat advanced 9 cents at \$3.55 and Toledo soft white wheat gained 10 cents at \$3.34 per bushel. Portland soft white wheat jumped up 30 cents at \$4.01 with hard winter ordinary wheat 25 cents higher at \$4.04 and 14 percent protein dark northern spring up 5 cents at \$5.05 per bushel.

Minneapolis spring wheat moved higher with strength coming from export interest plus the need of flour mills to buy high protein wheat for blending with the low protein new crop hard red winter wheat. Dark northern spring ordinary protein closed up 9 to 17 cents at \$4.00 to \$4.04, 13 percent went up 18 cents at \$4.34 to \$4.38 and 14 percent up 18 cents at \$4.58 to \$4.64 and medium milling quality hard amber durum advanced 10 cents at \$5.70 per bushel. Rye closed unchanged at \$2.65 per bushel.

Corn markets borrowed strength from wheat advances but showed some weak spots as Russia failed to buy feed grains in this round of negotiations. Chicago No. 2 yellow corn finished up 8 to 10 cents at \$2.96 to \$3.00 in box and hopper cars but Minneapolis market dropped a cent at \$2.82 per bushel. Kansas City No. 2 white corn traded 10 cents higher at \$3.00 when light farm selling failed to supply the increased processor interest. Chicago No. 2 heavy white oats went up 2 cents at \$1.53 per bushel.

Minneapolis best malting barley moved unchanged to up 10 cents at \$3.90 to \$4.15 with feed grade barley up 20 cents at \$2.10 to \$2.20 per bushel. Portland No. 2 western barley closed 12 cents higher at \$2.52 and the Los Angeles market went up 2 to 3 cents at \$2.66 to \$2.69 per bushel. Sorghum markets advanced after rain delayed harvest in Texas. Kansas City No. 2 yellow sorghum gained 20 cents at \$4.90 with Texas High Plains sorghum up 10 to 15 cents at \$4.65 to \$4.75 per hundred pounds.

Soybean markets moved unchanged to 6 cents a bushel higher as oil and meal markets showed strength and farmer selling of beans continued light. Chicago No. 1 yellow soybeans held at \$5.56 and Illinois crusher point prices closed steady to 6 cents higher at \$5.48 to \$5.58 per bushel. Minneapolis flaxseed held at \$8.25 per bushel and sunflower seed traded steadily at \$10.50 for old crop and \$11.50 per hundred pounds for new crop seed at Minneapolis or Duluth.

WEEKLY
SUMMARY
AND
STATISTICS

July 25, 1975

EXPORT BUSINESS STRENGTHENS MOST WHEAT AND GRAIN MARKETS

Additional sales of wheat and feed grain to Russia during the week contributed strength to most wheat and grain markets across the Nation during the period ended July 24. Fair to good rains over dry corn areas tempered the advance for feed grains but more rain will be needed to insure full production. Harvest in oat, barley and flax areas kept these markets inactive or easy. Selling increased a little but a conservative selling policy prevails.

Kansas City hard winter wheat went up 6 to 7 cents with ordinary protein at \$3.80 and 13 percent at \$4.22. Mill bought nearby requirements and exporters bought all available offerings from fair elevator selling and meager farm selling. Chicago No. 2 soft red winter wheat went up 2 cents at \$3.57 in the face of rapid harvest and good receipts during the week with most receipts going direct to mills and elevators on contract. Toledo soft white wheat closed steady at \$3.34 but Portland No. 1 soft white wheat fell 3 cents at \$3.98 per bushel. Portland hard winter ordinary closed down 3 cents at \$4.01 and dark northern spring 14 percent protein also off 3 cents at \$5.02 per bushel.

Minneapolis spring wheats finished lower as wheat harvest moved northward. Markets dull and slow at midweek but export interest improved at the close. No. 1 dark northern spring ordinary protein finished down 4 cents at \$3.96 to \$4.00 and 14 percent went down 5 to 6 cents at \$4.53 to \$4.58. Medium milling quality hard amber durum dropped 10 cents at \$5.60 per bushel. Rye fell 15 cents at 2.50 per bushel.

Yellow corn markets moved higher after Russia purchased corn and a few crop areas remained in the need of moisture. Chicago No. 2 yellow corn traded up 3 to 7 cents at \$2.99 to \$3.07 for box and hopper cars. Minneapolis market advanced 12 cents at \$2.94. Kansas City No. 2 white corn held at \$3.00 per bushel in slow trade. Chicago No. 2 extra heavy white oats fell 5 cents at \$1.48 as harvest progressed. Minneapolis best malting barley fell 40 to 50 cents at \$3.40 to \$3.75 as new crop harvest produced ample amounts of good quality grain. No. 3 or better feed barley dropped 15 cents at \$1.95 to \$2.05 but Los Angeles barley went up 3 cents at \$2.69 to \$2.72 per bushel. Kansas City No. 2 yellow sorghum traded up 10 cents at \$5.00 with light receipts going to local feed mixers. Texas High Plains sorghum went up 10 to 20 cents at \$4.85 per hundred pounds.

Soybean markets advanced strongly as Japan bought beans and speculative interest figured Russia would buy beans later in the year. Chicago No. 1 yellow soybeans rose 17 cents at \$5.73 and Illinois crusher point prices went 27 to 29 cents higher at \$5.77 to \$5.85 per bushel with oil and meal values rising in support of the raw bean complex. Minneapolis flaxseed fell 75 cents at \$7.50 per bushel as new crop started arriving. Old crop sunflower seed traded up 50 cents at \$11.00 per cwt at Minneapolis and Duluth with new crop at \$11.50, unchanged.

SPECIAL FEATURES

CCC: Grain Stocks June 1975	7
WHEAT: Monthly average cash prices, 1970-75	8 - 10
WHEAT EXPORT: Monthly average cash prices, 1970-75	11 -12

SUMMARY
AND
STATISTICS

August 1, 1975

WHEAT AND FEED GRAIN MARKETS MIXED

Wheat and feed grain markets moved in a mixed price trend across the Nation during the week ended July 31. The market turned to weather for direction after export nearby commitments were filled. Near drought conditions in the corn and soybean areas coupled with worsening drought in Russia pushed values sharply higher at midweek but forecast rain for the week end and fair showers over parts of the dry sections tended to reduce most quotes for wheat and feed grains at the close of the period.

Kansas City hard winter wheat closed steady on ordinary protein at \$3.80 but narrowing premiums for protein wheat cut 13 percent 6 cents at \$4.16 per bushel. Chicago soft red winter wheat fell 5 cents at \$3.52 with heavy receipts on previous orders covering immediate needs and added to storage stocks. Little outbound movement reported for the week. Toledo soft white wheat went down 4 cents at \$3.30 and Portland soft white wheat also dropped 4 cents at \$3.94 per bushel. Hard winter ordinary protein wheat at Portland traded down 7 cents at \$3.94 and dark northern spring 14 percent protein fell 8 cents at \$4.94 per bushel.

Minneapolis spring wheat fell 9-18 cents with dark northern spring ordinary protein 9 cents lower at \$3.87 to \$3.91 and 14 percent off 13-14 cents at \$4.40 to \$4.44. Medium milling quality hard amber durum went up 5-15 cents at \$5.65 to \$5.75 per bushel. No. 2 rye went up 10-15 cents at \$2.60 to \$2.65 with good demand from mills and terminal elevators.

Corn markets moved mixed as varying weather reports kept the market unsettled. Chicago No. 2 yellow corn closed one to 9 cents lower at \$2.98 while Toledo corn went up 5 cents at \$2.97 per bushel. Kansas City No. 2 white corn sold up 15 cents at \$3.15 in thin trade as some fields showed heat and drought stress. Chicago No. 2 white oats eased 3 cents at \$1.45 per bushel as harvest spread eastward, reducing demand.

Minneapolis best malting barley 70 percent or better plump fell 35-40 cents at \$3.00 to \$3.40 per bushel under new crop harvest pressure but feed grade barley went up 25-30 cents at \$2.25 to \$2.30 with good export interest at Duluth. Kansas City yellow sorghum traded 15 cents higher at \$5.15 per hundred pounds as month end commitments had to be met and dry land sorghum in the Midwest needed rain to insure a good crop.

Soybeans closed higher in spite of oil and meal markets moving to near week ago levels. Chicago No. 1 yellow soybeans ended 3 cents higher at \$5.76 but Illinois Crusher Point prices closed mixed 2 cents lower to 1 cent higher at \$5.78 to \$5.83 per bushel. Minneapolis flaxseed moved up 25 cents at \$7.75 per bushel and sunflower seed advanced \$1.00 per hundred pounds with old crop at \$12.00 and new crop at \$12.50 delivered Minneapolis or Duluth.

SUMMARY OF THE WHEAT SITUATION AS OF JULY 30, 1975

Even with some increase in domestic use and assuming that exports reach the high end of our projections, total use of U.S. wheat in 1975/76 likely will fall short of the 2.2 billion bushel crop that is being harvested. Thus, 1975/76 will be a year for stock rebuilding.

Deteriorating crop prospects in the Soviet Union and continued strong import demand in other regions point to U.S. exports of over a billion bushels for the fourth consecutive year. It appears that U.S. exports in 1975/76 could approach 1.2 billion bushels, compared with 1,039 million last season. Soviet purchases of U.S. wheat reported thus far this season total 4.2 million metric tons (154 million bushels); about 800,000 tons are scheduled for 1976/77 delivery. Export commitments already show around 400 million bushels of wheat sales, with India and the U.S.S.R. accounting for over two-thirds of the total. The Soviets have also purchased 3 million tons of wheat from Canada and 750,000 from Australia.

The 1975 world wheat crop, estimated at around 365 million tons, is up a little from a year ago. Substantial increases are expected in Canada, Argentina, India, and the United States, while Australia and Eastern and Western Europe will have smaller crops. In the Soviet Union's spring wheat areas, continuing dry weather into July brought a further reduction in wheat crop prospects to 85 million tons, about the same level as last year. World wheat trade for 1975/76 is projected at about 72 million tons, 3 million higher than a year ago and close to the 1972/73 record. Highlighting early season trade is the sharp jump in U.S.S.R. imports from 2.5 million tons last season to perhaps 10 million for 1975/76. As of July 24, the Soviets had purchased about eight million tons of wheat. If projected trade approaches the 1972/73 record, world wheat stocks will remain relatively tight at season's end.

HARD RED WINTER (HRW): The 1975 hrw crop appears to have broken the billion bushel barrier. Unfortunately, larger than usual amounts appear to be grading yellow hard, generally a lower protein subclass. Domestic demand is likely to pickup on the strength of expanded wheat feeding while mill grind may hold near last year's level. The quantity available for export or carryover is up sharply; early indications suggest that exports could be well above last year's 518 million bushels.

SOFT RED WINTER (SRW): A simple way to describe the 1975 srw crop is huge. At 347 million bushels, it is 20 percent above a year ago. Demand is expected to be large again this year because of heavier feeding and perhaps some recovery in mill grind. About 180 million bushels will be available for export and carryover. Exports will be a big uncertainty. Through mid-July, sales reports showed around 50 million bushels. Srw could get intense price competition from yellow hard for lower protein wheat import markets this year.

HARD RED SPRING (HRS): Prior to the Red River Valley flooding, the hrs crop was estimated at 388 million bushels, up a third from last year's poor harvest. Stocks as of July 1 were basically unchanged from a year ago but with the sharply larger crop, total 1975/76 supplies will be up a fourth. The demand for hrs this year will hinge on the quality of our hrw crop and the quality and size of the Canadian Spring Wheat crop. Even if domestic demand holds near the 1974/75 level, the quantity available for either export or carryover at 290 million bushels will be almost 50 percent above a year ago.

DURUM: Acreage planted to durum this spring jumped 13 percent and with better yield prospects, the durum crop estimate before the Red River Valley flood soared to 133 million bushels. Durum supplies likely will climb by a third to around 150 million bushels. Domestic use for durum slumped during 1974/75 as users shifted to a higher ratio of farina, replacing higher priced semolina. If durum is cheaper relative to hard wheat, then there may be some recovering in food use in 1975/76. The quantity of durum available for export and carryover this year will climb to over 100 million bushels. Sales prospects do not appear bright enough to prevent some building of durum stocks this year.

SOURCE: The Outlook and Situation Board

AGRICULTURAL HIGHLIGHTS: WEEK ENDED JULY 27

Precipitation centered mainly in Southeastern third of the Nation with heavy rains in Oklahoma, Texas and Louisiana. Temperatures normal to above normal throughout the Nation except in the Southwest. The Nation's winter wheat harvest is 80 percent complete the same as in 1974 and continues to move northward.

SMALL GRAINS: Small grain harvest continues into north central states as hot dry weather hastens development. Winter wheat harvesting made rapid gains throughout major growing area and by July 27th 80 percent of the 1975 crop harvested which brought it to the 1974 and normal pace. Kansas, Oklahoma, Texas, Missouri, Illinois and Indiana virtually finished with the winter wheat harvest.

Nebraska's harvest is 90 percent complete the same as normal, but 10 points below the excellent 1974 pace. Combines moved rapidly in Colorado and 76 percent of the crop harvested compared to the 45 percent in the previous week.

Hot weather hastened ripening in Montana and Idaho harvest just starting. Winter wheat harvest in Washington is picking up and 20 percent complete in Oregon.

Spring wheat 7 percent swathed in Minnesota and 21 percent combined in South Dakota.

CORN: Hot weather over the major corn growing area along with the smaller soil moisture supplies are causing some moisture stress to the crop. In nearly all North Central states corn prospects are ahead of last year and normal; however, additional moisture needed to maintain rapid development.

In Iowa scattered rains somewhat beneficial and lower leaf burning becoming more widespread. Sixty-seven percent of the fields compared with the 72 percent average were 75 percent or more silked. Wisconsin corn is 40 percent silked, still ahead of the normal 25 percent. Early corn setting ears and look good. Some leaves are rolling on sandy knolls and light soils.

Dry soil moisture conditions in Tennessee and Kentucky hampered development. Soil moisture is generally adequate in the South and the East.

SOYBEANS: Soybeans made satisfactory progress throughout major producing areas. Normal to slightly above normal temperatures prevailed in North Central region and rain in the Southeastern states.

In North Central states soybeans continued to develop ahead of 1974 and normal. In Illinois leading soybean producing state 84 percent acreage blooming 53 percent setting pods. In Iowa 45 percent setting pods 29 percent average. Additional moisture is needed in Central and North Central areas. Prospects improved for a late Arkansas soybeans and early beans were blooming and setting fruit. In Mississippi 11 percent podding.

OTHER CROPS: Rains delayed completion of sorghum harvesting in South Texas harvest just starting in blackland areas. Kansas crop was 10 percent headed versus 20 percent average with some moisture stress being experienced.

In Georgia 98 percent of the peanuts were blooming digging of early peanuts started in South Texas.

WHEAT AND FEED GRAIN MARKETS STRONG

Spreading drought in Europe, continued dry weather in parts of the U.S. corn and soybean belts and farmer holding of grain pushed values sharply higher across the Nation during the period ending August 7.

Kansas City hard winter wheat traded sharply higher after farmers continued to hold stocks tightly. Ordinary protein traded 24 cents higher at \$4.04 with 13 percent up 28 cents at \$4.44 per bushel. Chicago soft red winter wheat climbed 24 cents at \$3.76 and Toledo soft white wheat rose 24 cents at \$3.54. Portland soft white wheat advanced 18 cents at \$4.12 in spite of a large crop being harvested in the Pacific Northwest. Hard winter ordinary protein wheat at Portland went up 17 cents at \$4.11 and dark northern spring 14 percent protein traded 23 cents higher at \$5.17 per bushel.

Minneapolis dark northern spring wheat closed sharply higher with ordinary protein up 37 cents at \$4.24 to \$4.28 and 14 percent up 32 cents at \$4.72-4.76 per bushel. Medium milling quality hard amber durum moved up 20-25 cents at \$5.90 to \$5.95 and rye gained 15-20 cents at \$2.80 per bushel.

Corn markets responded to light farmer selling in spite of congested elevator and export facilities and Chicago No. 2 yellow corn traded up 15-25 cents at \$3.13 to \$3.23 per bushel. Kansas City white corn moved up 10 cents at \$3.25 in slow trade as farmers held old crop supplies tightly and awaited market advances before making large sales. Chicago white oats advanced 12 cents at \$1.57 with harvest progressing rapidly and terminal receipts increased.

Minneapolis best malting barley moved mixed under heavy receipts and good demand and closing prices ended 5 cents lower to 25 cents higher at \$3.25 per bushel. Strong export interest pushed feed barley values up 10-15 cents at \$2.40 per bushel. Kansas City yellow sorghum traded 25 cents higher at \$5.40 and Texas High Plains price went up 30-35 cents at \$5.20 to \$5.30 per hundred pounds. Good feed lot demand furnished most of the strength until the close when export interest widened after the market close.

Soybean markets responded to worsening drought conditions and oil and meal values supported price advances in raw bean trade. Chicago No. 1 yellow soybeans closed 49 cents higher at \$6.25 with Illinois crusher point prices up 34-53 cents at \$6.12 to \$6.36 per bushel. Minneapolis flaxseed finished the period steady at \$7.75 per bushel and sunflower seed traded unchanged at \$12.00 for old crop and \$12.50 for new crop per hundred pounds delivered Duluth or Minneapolis.

AGRICULTURAL HIGHLIGHTS

HIGHLIGHTS: Rains over the corn belt August 1 to 3 helped sustain the corn and soybean crops and relieved some of the stress from the hot weather. Corn is in fair to good condition and developing earlier than last year. The soybean crop maintained generally good condition and is in a more advanced stage of development than last year. Cotton is in fair to good condition.

SMALL GRAINS: Small grain harvesting continued to show progress last week and the winter wheat harvest is 85 percent complete compared with 86 for both last year and average. Harvest of winter wheat is in the final stages in all of the North Central states except North Dakota where it has just started. Montana and Idaho have started harvest, both later than last year.

SPRING WHEAT: Harvest in South Dakota progressed to 43, behind last year's 82, and average of 49. Minnesota's harvest advanced only 2 points from last week to 9 complete. North Dakota's harvest is just starting.

OATS: Harvesting is lagging behind last year's pace in the two largest states, South Dakota and Minnesota, where 69 and 29 have been combined compared with 1974's 82 and 32.

BARLEY: Harvest has started in North Dakota and is 12 percent complete. Montana, the next leading state, has 50 turning color but none ripe.

CORN: Corn in most states is in fair to good condition. Development of the crop is generally earlier than last year, except in Kansas where it is the same and Nebraska where it is slightly behind last year.

The crop in Iowa, the top corn state, is approaching a critical stage. Late planted corn and corn on lighter soils are showing additional stress from the hot, dry weather. Growing conditions remained mostly fair and pollination fair to good. Iowa has 92 of the acreage in the silk or later stage this year, compared with 74 in 1974 and 85 average. Illinois, the next largest corn state, received additional moisture on the eastern side of the state maintaining the crop in good to excellent condition. Illinois corn is 60 in the dough stage, compared with 10 in 1974 and 24 average. Topsoil moisture is generally short in Nebraska and Kansas with the eastern two-thirds of Kansas becoming critically short. Conditions in other states vary from fair to mostly good in North Carolina to good to excellent in Alabama.

SOYBEANS: The soybean crop made average development last week and is in fair to good condition. Soybeans in Illinois, the leading producer, are rated good to excellent and much earlier than last year's late crop. Seventy percent of the soybean acreage is setting pods, compared with 17 in 1974 and 35 average. As estimated 92 of the soybeans have reached the bloom stage or later; it was 54 in 1974 and 69 average. Iowa, the second largest soybean state, has 60 of the crop setting pods, 29 in 1974, and 41 average. Eighty-four percent of the soybeans are blooming or later; 71 in 1974, and 77 average. Late planted soybeans in Arkansas continue to show stress but weekend rains should have provided some relief. Early plantings are blooming and setting pods. Weeds and grass are becoming a problem in Alabama and Louisiana fields. Rain in Tennessee improved crop conditions.

OTHER CROPS: Sorghum harvest made excellent progress in the early areas of Texas; 37 harvested, 40 1974, and 27 average. It's just starting in the Blacklands east. High and low plains sorghum is developing well but greenbugs are increasing and spray programs are required in some localities. Sorghum development in Oklahoma is late; 25 dough stage, 31 1974. Kansas and Nebraska sorghum crops are ahead of last year with 20 and 55 headed, compared with 10 and 40 respectively for last year.

AND
STATISTICS

August 15, 1975

WHEAT STRONG, FEED GRAIN MARKETS MIXED

Wheat markets turned strong as export interest revived but feed grains traded mixed after showers partially relieved dry conditions in parts of the U.S. and European grain areas. Strong export interest both for nearby and deferred positions kept exporters in cash and futures markets at the close of the week. Flour mill buying fell off but fair country selling of wheat found an easy hedge at futures boards and cash offerings were readily absorbed by the trade. Coarse grains found fewer buyers as offerings increased from country points after fair rain fell over wide areas of the grain sorghum, corn and soybean areas.

Kansas City hard winter wheat advanced 11-13 cents per bushel with the greatest strength in ordinary wheat. Hard winter ordinary protein traded up 13 cents at \$4.17 with 13 percent at \$4.55 per bushel. Chicago soft red winter wheat rose 13 cents at \$3.89 in spite of sharp rise in elevator stocks during the week. Toledo soft white wheat went up 14 cents at \$3.68 and Portland soft white wheat advanced 11 cents at \$4.23 per bushel. Hard winter ordinary protein at Portland traded 12 cents higher at \$4.23 and dark northern spring 14 percent protein moved 9 cents higher at \$5.26 per bushel.

Minneapolis dark northern spring sold up 7-12 cents with ordinary protein at \$4.31 to \$4.40 while 14 percent protein traded 10 cents higher at \$4.82 to \$4.86. Medium milling quality hard amber durum advanced 25-30 cents at \$6.20 with strong export interest at Duluth supporting the market in spite of heavy arrivals. Rye went up 30 cents at \$3.10 with good export demand absorbing the offerings.

Yellow corn markets moved lower under slow buying interest and increased country selling after rain fell over much of the dry areas and feeder interest failed to come up to expectations. Chicago No. 2 yellow corn closed unchanged to six cents lower at \$3.07 to \$3.23 with the high bid supported only by buyers of corn delivered in hopper cars. Kansas City white corn held unchanged at \$3.25 in slow trade as local merchandisers held fair quantities of old crop corn and farmers held new crop white corn tightly. Chicago white oats dropped 5 cents at \$1.52 per bushel with light trade as new crop harvest supplied much of the trade needs at eastern markets.

Barley showed independent strength from other feed grains as broad interest kept offerings cleaned up. Minneapolis best malting barley traded 25-40 cents higher at \$3.50 to \$3.75 and feed grade barley went 45 cents higher at \$2.85 per bushel. Stockton No. 2 western barley traded 9-10 cents higher at \$2.83 to \$2.88 per bushel. Sorghum markets moved mixed with Texas High Plains market 5-10 cents higher at \$5.30 to \$5.35 per hundred pounds as harvest neared the end but Kansas City price fell 25 cents at \$5.15 with little local buying interest as country offerings moved direct to feedlots and poultry feeding areas and rain fell over parts of the sorghum area.

Chicago No. 1 yellow soybeans fell 21 cents at \$6.04 per bushel as fair rain fell over most of the dry soybean area. Illinois crusher point prices fell 12-21 cents at \$6.00 to \$6.15 per bushel with heavier offerings and reduced buying interest as oil and meal markets weakened. Minneapolis flaxseed held at \$7.75 per bushel but sunflower seed went up \$1.25 per cwt at \$13.25 for old crop and \$13.75 for new crop seed delivered at Minneapolis or Duluth.

AGRICULTURE HIGHLIGHTS

Aug. 12, 1975

Small grain combining moved ahead of most harvesting in North Dakota and Northwest. Corn continues to develop ahead of the 1974 average. Corn is in good condition in the eastern corn belt. Dry conditions persisted in the Western corn belt. Soybeans have good progress East, North Central and South showing effects of low moisture in the West North Central.

SMALL GRAINS: combining closer completion. Winter wheat is 87 percent complete. North Dakota is 67 percent combined. Progress is slow and in Montana frequent showers. Harvest is 10 percent done. Idaho in full swing in another one to two weeks. Utah picking up and is 25 percent done. Wyoming, Oregon have combined 60 percent. Washington is in full swing. Spring wheat in harvest; Minnesota is 23 percent complete. South Dakota 75 percent average 69 percent; North Dakota 9 percent combined. Montana later than usual at 10 percent ripe with the normal at 60 percent. Idaho is 20 percent ripe, 40 percent in 1974.

Minnesota oat harvest at 54 percent completion. South Dakota is 89 percent harvested. Barley harvesting under way in North Dakota, Minnesota is 39 and 49 percent harvested respectively. Montana 20 percent ripe 80 percent last year 50 percent normal.

CORN: Hot dry weather continued in western corn belt states. Eastern corn belt has adequate rainfall and below normal temperatures. Scattered rains in Iowa during the weekend. More rain is needed to relieve stress at six weeks below normal rain. Northwest Iowa has heavy rains. Local rain in Southeastern Kansas conditions are dry in other western corn belt.

Iowa is 63 percent in milk stage, 32 percent in dough stage. Stress signs common, silage cut lighter soils. Illinois good to excellent and ahead of normal, 80 percent dough normal 48 percent. Thirty percent dent 9 percent average. Irrigated corn in Nebraska good to excellent 95 percent silked. Dryland corn fair to good is 90 percent silked. Moisture stress evident in drylands same eastern two thirds Kansas where firing was observed. South Dakota, Minnesota deteriorating low rain prospects. Missouri declining. Ohio, Indiana continues to develop ahead of normal.

SOYBEANS: Soybean crop fared better than corn in West and North Central, but the dry conditions evident. East, North and Central continues good progress and normal. Illinois 88 percent 32 percent 1974, 88 percent average. Crop good to excellent. Iowa pods set 77 percent in 1974 55 percent average to 62 percent. Crop fair to good. Rainfall needed. Nebraska ahead of normal, 75 percent podded 70 percent normal. Dryness in Kansas retarded development.

Widespread showers improved prospects in Arkansas. Early fields growing rapidly in heavy bloom. Mississippi reached normal.

COTTON: Rains in Southeastern improved prospects during the week. Mississippi at 88 percent set bolls 90 percent in 1974. Arkansas fruiting heavily many large bolls forming. Alabama good condition 90 percent set bolls. South Atlantic good condition with insect problems. Prospects are good in Texas with some picking underway, 3 percent complete 5 percent in 1974 and 4 percent average. New Mexico and Arizona has late development. California is in good condition.

OTHER CROPS: Sorghum harvesting Texas 42 percent is harvested. Development in Kansas, Nebraska is ahead of 1974 35 percent, 80 percent headed. Maine potatoes reflect low rainfall light yields expected. Idaho excellent progress. Five percent turning color 20 percent 1974. Washington's harvest active.

Texas rice harvest trailing 1974 40 percent harvested. Arkansas first field cut. Additional fields drained.

Pastures and livestock in poor condition West North Central much better than East North Central. Rainfall is adequate. Ranges West improved but poor shape lower in mountain states because low rainfall.

SOURCE: Department of Commerce

WEEKLY ROUNDUP OF WORLD PRODUCTION AND TRADE AUGUST 13, 1975

Record heat and lack of rain are affecting crop prospects in Western Europe, according to the weekly roundup of developments in World Agricultural and trade issued August 13, by the U.S. Department of Agricultural.

The report said hot, dry weather of a few weeks ago has returned to Northern Europe and spread throughout Western Europe.

Spring grains, sugarbeets, pastures and other crop are suffering. Good rains soon could prevent heavy losses, but production potential is being reduced daily.

France, for example, has not had significant rain since the first week in July and temperatures have reached into the 90's as far North as the Nordic Countries.

Elsewhere, the performance of the monsoon in India was described as "magnificent," and widespread rain fell in Japan the first week of August after several weeks of very dry weather. North and Northeast China and Inner Mongolia also had considerable rain.

Recent rains also relieved dry conditions in Canada's maritime provinces, arresting the decline in potato production prospects. On potatoes, USDA analysts said the world crop bears watching, as heat, drought and flood have made a good potato crop unlikely anywhere in Europe this year, with the possible exception of the Soviet Union.

Devastating thunderstorms early this month caused severe crop damage in Spain's Leon Province, including the possible loss of more than half of Spain's hop crop.

GRAIN AND FEED

The department Monday revised its estimate of total Soviet grain production downward by 5 million metric tons, to 180 million metric tons.

The reduction came in the estimate for grains other than wheat, wheat prospects remained at 85 million metric tons.

U.S.D.A. said the estimated reduction in the soviet grain harvest now points to a total grain import requirement of about 25 million tons, given current soviet livestock feeding policies.

Combined production of all grain (including rice) in Portugal this year is now estimated at about 1.7 million metric tons, up 12 percent over 1974. The larger grain crops in prospect this year are attributed mainly to favorable weather conditions. Portugal's combined grain and feed imports for the 1975/76 marketing year are expected to be somewhat lower than 1974/75 imports of about 1.9 million tons because of increased grain production and a leveling off in feed consumption, which, in part, reflects the unstable political situation. The United States supplied about 53 percent of Portugal's imports of grain and feed (mainly wheat and corn) in 1974/75 and is expected to retain a similar share of the market in 1975/76.

The EC Commission reportedly has taken no direct measures to prevent the soviets from buying EC wheat or other grains. According to trade sources, however, the EC Commission is not expected to consider sales of grain to the USSR until September at the earliest. No decision on selling large amount of grain to any third country is expected of the commission until there are clearer indications of this year's crop, which is threatened in some places by a current severe dry spell. The EC has recently taken measures to tighten up grain exports by reducing the export subsidy to zero to all but a few destinations and by cutting the time period of export license validity from 90 to 30 days.

The wheat harvest is nearing completion in Turkey with a record crop of about 10 million metric tons, up 20 percent over 1974. Although the record wheat output is expected to cover most of Turkey's requirements, Turkey is still trying to purchase 500,000 tons of wheat on the international market. All bids to her latest tender, however, have been rejected because of guarantees now required of Turkey by world grain traders in view of her failure to honor contracts under a previous tender. Following last year's poor crop, Turkey had to import over 1 million tons of wheat to cover requirements.

OILSEEDS AND PRODUCTS

The 1975 rapeseed crop in West Germany is estimated at 230,000 metric tons, down 18 percent from last year's outturn of 230,000 tons. This year's crop has been adversely affected by weather conditions and winter-kill.

Liberia has signed an agreement with the government of the Ivory Coast under which technicians from the Ivory Coast will conduct feasibility studies for new plantations totaling 150,000 acres of oil palms and 20,000 acres of coconut palms. Coffee and cocoa plantations, totaling 25,000 acres, also will be included in the plan.

"The Economic Research Service, in cooperation with the Grain Division, AMS, is mailing a questionnaire to Numerous elevators across the nation. These elevators were chosen through a statistical sampling method by the Statistical Reporting Service. If you receive a questionnaire, your cooperation would be appreciated.

Data collected on this survey will be used in preparing statistical summaries about the grain trade and to determine wheat changes and improvements are needed in the Department's grain price reporting program to better serve needs of grain producers, handlers, merchandisers, and users."

WEEKLY
SUMMARY
AND
STATISTICS

August 21, 1975

WHEAT STRONG—FEED GRAIN MARKETS MIXED

Wheat markets across the Nation responded to heavy export sales during the week ended August 21. Reduced output of grain in the world excluding the U.S. caused increased sales from this country with Eastern Europe reported buying unusually large quantities of wheat and feed grains. Congestion at ports and the underlying threats of strike by port workers and transportation unions caused a nervous and confused feed grain trade.

Kansas City hard winter wheat went up 11-25 cents with ordinary protein 25 cents higher at \$4.42 and 13 percent protein up 11 cents at \$4.66 per bushel. Chicago soft red winter wheat advanced 29 cents at \$4.18 and Toledo soft white wheat price rose 30 cents at \$3.98 per bushel. Portland soft white wheat traded 36 cents higher at \$4.59 hard winter ordinary wheat 36 cents higher at \$4.59 and dark northern spring 14 percent protein also 36 cents higher at \$5.62 per bushel to arrive Portland.

Minneapolis spring wheat market advanced under strong export buying at Duluth and ordinary protein went 7-8 cents higher at \$4.38 to \$4.42 and 14 percent protein gained 10-14 cents at \$4.92 to \$5.00 per bushel. Medium milling quality hard amber durum moved up 50-60 cents at \$6.70 to \$6.80 and No. 2 rye advanced 25 cents at \$3.35 per bushel.

Feed grains showed spotty strength, but wheat congested ports, rain over large areas needing moisture, and threats of transportation and dock workers strikes kept traders cautious buyers of grain for nearby shipment. Chicago No. 2 yellow corn held steady at the top of last week's range and the bottom side went up 6 cents to close at \$3.13 to \$3.23 per bushel. Kansas City white corn held at \$3.25 for rail receipts but Atchison truck white corn advanced 15 cents at the close of the period, \$3.15 per bushel. Chicago white oats moved up seven cents at \$1.59 while Toledo market held at \$1.46 per bushel.

Minneapolis best malting barley traded 25-40 cents higher at \$3.90 to \$4.00 and feed grade barley went up 25 cents at \$3.10 per bushel. Kansas City yellow sorghum held at \$5.15 per cwt all week with practically no trading. Texas High Plains sorghum traded unchanged to 5 cents higher at \$5.30 to \$5.40 per hundred pounds.

Chicago No. 1 yellow soybeans closed up 1 cent at \$6.05, but with fair moisture over soybean areas during the week, farmers sold heavier amounts and Illinois crusher point prices fell 1-3 cents at \$5.99 to \$6.12 per bushel. Minneapolis flaxseed traded unchanged at \$7.75 per bushel while sunflower seed moved up 25 cents at Minneapolis at \$14.00 and up 50 cents at \$14.25 per hundred pounds at Duluth.

SPECIAL FEATURES

1976 Feed grain, wheat, Upland cotton program provisions announced	5
WHEAT, FLOUR AND WHEAT PRODUCTS, U.S. exports by months.....	7

DUE TO TECHNICAL DIFFICULTIES THE FAS REPORT OF OUTSTANDING EXPORT SALES FOR AUGUST 10, 1975 WILL NOT BE AVAILABLE UNTIL AFTER 3:00 P.M., FRIDAY.

GRAINS: Closing prices, basic contracts No. 2 for future delivery

1976 FEED GRAIN, WHEAT, UPLAND COTTON PROGRAM PROVISIONS ANNOUNCED

Secretary of Agriculture Earl L. Butz on August 21, said there will be no set-aside requirement for the 1976 feed grain, wheat and Upland cotton programs. It will be the third consecutive year for the feed grain and wheat programs and the fourth for the Upland cotton program in which no set-aside was required.

Feed grain and wheat producers are not being encouraged to take cropland out of production next year, Department officials explain, because even though this year's corn and wheat crop are expected to be at record levels, export demand is strong. For Upland cotton, reduced 1975 plantings will result in a crop approximately two million bales smaller than in 1974; also the Department forecasts an increase in domestic usage and movement into export.

As announced in 1973, there will be no conserving base requirements for the duration of the Agriculture and Consumer Protection Act of 1973 (through the 1977 crop year). The Secretary announced also at that time that effective through the 1977 crop year he will not use his discretionary authority to limit feed grain and wheat plantings to a percentage of allotments and Upland cotton planted in excess of the base allotment.

In 1976, as in the present year, producers may substitute any non-conserving crop (except marketing quota crops) or any conserving crop (including approved volunteer cover) used for hay or for grazing in order to preserve their wheat, feed grain or cotton allotments.

Secretary Butz said today's announcement will provide farmers with information they need to make their 1976 crop planting decisions. The programs are designed to provide farmers decision-making freedom to produce for the marketplace. Additional program provisions will be announced after the department has had an opportunity to review additional 1975 production data.

WEEKLY
SUMMARY
AND
STATISTICS

August 29, 1975

WHEAT AND FEED GRAIN MARKETS WEAK

Wheat and feed grain markets lost steam as nearby export commitments were largely satisfied by heavy farmer selling the past two weeks and prices fell sharply across the nation during the week ended August 28. Threat of a longshoreman boycott against loading wheat to Russia and the possibility of an elevator workers strike at Chicago worked to cool demand for nearby shipment. Rains over the sorghum, soybean, and corn areas added pressure on the down side. Export buying during the week was confined to wheat for Japan and Taiwan with shipment September through November. Exporters showed little interest in buying grain for nearby shipment, but bid actively in forward months.

Kansas City hard winter wheat declined sharply with ordinary protein 26 cents lower at \$4.16 and 13 percent protein 24 cents lower at \$4.40. Chicago soft red winter wheat traded 40 cents lower as stocks accumulated and an elevator workers strike was a possibility. Soft red wheat finished at \$3.78 per bushel. Toledo soft white wheat moved down 36 cents at \$3.62 with stocks accumulating at local elevators. Portland soft white wheat fell 18 cents under pressure of heavy harvest and slowed export activity and white wheat closed at \$4.41, hard winter ordinary protein at \$4.41, and 14 percent protein dark northern spring wheat 22 cents lower at \$5.40 per bushel.

Minneapolis spring wheat traded 9 to 26 cents lower with ordinary protein at \$4.12 to \$4.17, 14 percent protein at \$4.74 to \$4.78, medium milling quality hard amber durum wheat 30 to 40 cents lower at \$6.40, and No. 2 rye 25 cents lower at \$3.10 per bushel.

Yellow corn markets followed wheat lower and Chicago No. 2 yellow corn fell 13 cents at \$3.00 to \$3.10 in box and hopper cars. Kansas City No. 2 white corn held at \$3.25 in light trade with offerings very scarce and buying interest thin. Chicago heavy white oats moved 14 cents lower at \$1.45.

Minneapolis No. 3 or better malting barley, 70 percent or better plump held at \$3.90 to \$4.00 with heavy brewing season supporting the market, but feed grade barley traded 5 cents lower at \$3.05 per bushel. Los Angeles No. 2 Western barley dropped 7 to 8 cents at \$3.00 to \$3.02 per bushel.

Kansas City sorghum sold 15 cents lower at \$5.00 per hundred pounds in dull trade. Texas High Plains sorghum fell 25 to 30 cents at \$5.00 to \$5.15 as rains fell over late harvest areas. Chicago No. 1 yellow soybeans went down 56 cents at \$5.49 per bushel. Export interest lagged and falling oil and meal markets gave no support. Illinois crusher point prices dropped 44 to 45 cents at \$5.55 to \$5.67 per bushel and Minneapolis flaxseed declined 25 cents at \$7.50 per bushel. Minneapolis and Duluth sunflower seed traded 50 cents lower at \$13.50 for old crop and \$13.75 for new crop per hundredweight.

NOTICE: Outstanding Export Sales for August 10, 1975 is included in this issue.

WEEKLY
SUMMARY
AND
STATISTICS

September 5, 1975

WHEAT STRONGER, FEED GRAINS MOSTLY WEAKER

Wheat markets firmed but feed grains traded generally weaker across the nation during the week ended September 4. Longshoremen loaded grain under court order on ships bound for Russia and the Chicago elevator workers strike was settled, this coupled with strong farmer holding boosted wheat markets sharply above mid period low prices. Feed grain markets showed little activity and price recoveries fell short of week ago closing prices.

Kansas City hard winter wheat closed mixed with ordinary protein steady at \$4.16 with 13 percent up 11 cents at \$4.51 per bushel. Chicago soft red winter wheat advanced 24 cents at \$4.02 and Toledo soft white wheat traded 13 cents higher at \$3.75 per bushel. Portland soft white wheat closed 3 cents higher at \$4.44 with hard winter ordinary up 3 cents at \$4.44 but dark northern spring 14 percent protein eased 2 cents lower at \$5.38 per bushel.

Minneapolis spring wheat closed stronger with ordinary protein 15 cents higher at \$4.27 to \$4.32, 14 percent protein up 16-17 cents at \$4.91 to \$4.94 and medium milling quality hard amber durum 10 cents higher at \$6.50 per bushel. Rye held unchanged at \$3.10 per bushel.

Corn market recovery fell short of last week's closing price with Chicago No. 2 yellow corn 3-4 cents lower at \$2.96 to \$3.07 but Kansas City No. 2 white corn held at \$3.25 in slow trade. Chicago heavy white oats finished up 5 cents at \$1.50 per bushel but trade very slow.

Minneapolis best malting barley held at \$3.90 to \$4.00 but feed grade barley dropped 5 cents at \$3.00 per bushel. Los Angeles No. 2 western barley fell 2 cents at \$2.98 to \$3.00 per bushel.

Kansas City No. 2 yellow sorghum closed 30 cents lower at \$4.70 per cwt as demand held at low levels and harvest spread into the local area. Los Angeles sorghum traded 5 cents lower at \$6.15 to \$6.20 per cwt.

Chicago No. 1 yellow soybeans rose 2 cents at \$5.51 per bushel in thin trade as farmers held stocks tightly and little nearby export business surfaced. Crushing plants bought cautiously as they expected a large crop to be harvested in the near term. Illinois crusher point prices finished up 2-3 cents at \$5.58 to \$5.65 per bushel. Minneapolis flaxseed fell 25 cents at \$7.25 per bushel. Sunflower seed advanced 25 cents for delivery at Minneapolis or Duluth with old crop at \$13.75 and new crop at \$14.00 per hundred pounds.

GRAINS: Closing prices, basic contracts No. 2 for future delivery

WEEKLY
SUMMARY
AND
STATISTICS

September 12, 1975

WHEAT AND MOST FEED GRAIN MARKETS WEAKER

Wheat and most feed grains traded lower across the country during the week ended September 11. Slowed export buying, start on new crop fall grain harvest and congestion at ports kept buyers on the sidelines. Farmers selling not burdensome however, and rain delayed harvest at the close causing some concern at soybean processing plants for nearby supplies. Several Gulf Port elevators scheduled two weeks down time to repair and clean facilities and have neared the end of the first weeks operations. Duluth-Superior Port congestion is clearing and longshoremen have agreed to load vessels for export to Russia. Spring wheat harvest nears completion but protein values are below earlier expectations causing some anxiety among exporters and mills who must compete for the smaller supply of high protein wheat.

Kansas City hard winter wheat closed lower with ordinary protein down 5 cents at \$4.11 and 13 percent protein 4 cents lower at \$4.47 per bushel. Chicago soft red winter wheat weakened as the increased production and accumulating stocks at Chicago elevators weighed against values. Soft red winter closed 6 cents lower at \$3.96 and Toledo soft white wheat also fell 6 cents at \$3.69 per bushel. Portland soft white wheat harvest rapidly approached completion and dull buying interest lowered prices 11 cents at \$4.33 for white and for hard winter ordinary protein wheat. Dark northern spring 14 percent closed 7 cents lower at \$5.31 per bushel.

Minneapolis dark northern spring wheat fell sharply as export sale slowed and port congestion discouraged ownership of fairly heavy farmer offerings. Dark northern spring ordinary protein fell 18-22 cents at \$4.09 to \$4.10 while 14 percent protein went down 16-19 cents at \$4.75 per bushel. Medium milling quality hard amber durum dropped 15-25 cents at \$6.25 to \$6.35 per bushel. Rye finished 10 cents lower at \$3.00 per bushel.

Corn markets turned dull and lower as new crop harvest started earlier than expected but rain halted combining over large areas at the close of the period. Chicago No. 2 yellow corn declined 11-17 cents at \$2.85 to \$2.90 and Kansas City No. 2 white corn fell 10 cents at \$3.15 per bushel. Chicago No. 2 white oats dropped 2 cents at \$1.48 but Minneapolis oats closed 2 cents higher at \$1.70 per bushel.

Minneapolis best malting barley 70 percent or better plump held at \$3.90 to \$4.00 and feed grade barley traded steady at \$3.00 per bushel. Los Angeles No. 2 western barley eased 2-3 cents lower at \$2.95 to \$2.98 per bushel.

Kansas City yellow sorghum dropped 20 cents at \$4.50 per hundred pounds with fair amounts of new crop grain offered during the week. Texas High Plains sorghum traded 30-35 cents lower at \$4.80 to \$4.85 per cwt.

Chicago No. 1 yellow soybeans sold 12 cents lower at \$5.39 per bushel with processors awaiting new crop harvest momentum before buying large amounts, however supplies of old crop beans at some plants are nearing exhaustion. Illinois crusher plant soybean prices went 16-23 cents lower at \$5.35 to \$5.49 per bushel. Minneapolis flaxseed held at \$7.25 per bushel but sunflower seed went down 50 cents at \$13.25 Minneapolis and 25 cents lower at \$13.50 per 100 pounds delivered Duluth.

AGRICULTURAL HIGHLIGHTS

WEEK OF SEPTEMBER 1-7

HIGHLIGHTS: Above normal temperatures and added precipitation over much of the major row crop area continued to favor maturity. Remaining winter wheat harvest moved at slow pace while spring wheat combining made good advancement.

SMALL GRAINS: Cool wet weather in the Northern states hindered small grain harvest which is much behind normal. Winter wheat combining continues active in Idaho, Montana, Utah and Washington but damp conditions limit hours of actual harvesting.

Spring wheat harvest was 70 percent finished by September 7th much behind normal. Combining was hampered by wet weather North Dakota where 62 percent was harvested 81 percent Minnesota and 40 percent Montana. Durum harvest was also lagging in North Dakota where only 42 percent of crop was in bins versus normal at 64 percent.

Winter wheat seeding has started in Kansas, Michigan and Missouri. It is 3 percent finished in Texas, 5 percent in Indiana, 10 percent in Montana and 22 percent finished in both Colorado and South Dakota. Dry conditions continue to slow seeding progress in much of the southern Great Plains.

CORN: Favorable weather during the week in most areas continued to push maturity of the 1975 corn crop.

In North Central states above normal temperatures over much of the major corn growing area further advanced the crop toward maturity. Illinois crop was in mostly excellent condition and 75 percent was mature against 20 percent in 1974 and the normal 31 percent. Iowa corn was 43 percent mature and safe from frost compared with 24 percent in 1974 and an average of 34 percent. Corn was 30 percent mature in Ohio, 25 percent in Nebraska, 22 percent in South Dakota and 20 percent in Indiana. Maturity in all of these states was ahead of 1974 and normal. Harvest of corn for grain was underway in Illinois and Indiana while corn silage harvesting was active in most of the Northern States.

Corn harvesting accelerated in several Southern States as dry weather, much of week pushed development. Corn in Kentucky was 20 percent mature much ahead of the 1974 and usual pace while Tennessee 36 percent was mature versus 41 percent in 1974 and an average of 36 percent.

SOYBEANS: Soybean development continued strong as additional moisture and above normal temperatures supported crop over much of the major producing area.

In North Central States much of the crop has leaves turning and in many areas the leaves are shedding. Illinois soybeans were 40 percent shedding leaves much ahead of 4 percent in 1974 and average of 8 percent. Iowa crop was in mostly good conditions rains are aiding pod filling and 44 percent had leaves turning versus 23 percent in 1974 and 37 percent average. Soybeans in Minnesota were 30 percent shedding leaves 20 percent in Indiana and 15 percent in Ohio. Harvest started in Illinois and Indiana and was 1 percent done in Missouri.

In the south soybean prospects continue to improve and many fields are beginning to mature. Soybeans in Arkansas were in mostly good condition but many areas needed rain. Mississippi 24 percent of leaves were turning and 8 percent shedding.

SORGHUM: Sorghum harvesting in Texas advanced to 59 percent complete versus 52 percent in 1974. Late sorghum in the High Plains needs rain. Sorghum was 50 percent mature Oklahoma and 10 percent mature in Kansas.

WEEKLY
SUMMARY
AND
STATISTICS

September 19, 1975

MOST WHEAT AND FEED GRAIN MARKETS MOVE HIGHER

Most wheat and feed grain markets moved to higher price levels across the Nation during the week ended September 18. No big market moving factors emerged but an accumulation of factors tended to keep speculative interest strong. Improved chance of selling more wheat and feed grains to Eastern Europe and to Russia, fairly tight holding of grain stocks at the farm level and a small reduction in prospective new crop corn production contributed enough strength to overcome the bearish downward pressure of start up of new crop corn, sorghum and soybeans and the lack of substantial sales into export. Flour mills ran fairly heavy schedules and bought wheat to replace grind. High protein wheat continued in good demand as U.S. and Canadian wheat did not produce the amount of high protein wheat that was expected early in the season.

Kansas City hard winter ordinary wheat closed 19 cents higher at \$4.30 with 13 percent up 18 cents at \$4.65. Chicago soft red winter wheat went up 22 cents at \$4.18 and Toledo soft white wheat advanced 20 cents at \$3.89 per bushel. Portland soft white wheat gained 16 cents at \$4.49 with hard winter ordinary protein up 16 cents at \$4.49 and 14 percent protein dark northern spring wheat up 19 cents at \$5.50 per bushel.

Minneapolis dark northern spring ordinary protein sold up 6-7 cents at \$4.16 with 14 percent protein up 15 cents at \$4.90 per bushel. Medium milling quality hard amber durum dropped 10 cents at \$6.25 with heavy receipts and light buying interest. Rye dropped 10 cents at \$2.90 per bushel.

Corn markets moved up sharply as early harvested fields produced less yield than had been expected and scattered rain delayed combining. Chicago No. 2 yellow corn traded 24 cents higher at \$3.09 to \$3.14 in box and hopper cars. Kansas City white corn dropped 10 cents at \$3.05 per bushel as new crop offerings increased. Chicago No. 2 white oats traded unchanged at \$1.48 per bushel with light activity.

Minneapolis best malting barley 70 percent or better plump held steady at \$3.90 to \$4.00 with feed grade barley 10 cents higher at \$3.10 per bushel. Kansas City yellow sorghum went up 25 cents at \$4.75 with improved export interest and heavier sales into California feed lots. Texas High Plains sorghum advanced 20-25 cents at \$5.00 to \$5.10 per hundred pounds.

Chicago No. 1 yellow soybeans moved up 40 cents at \$5.78 per bushel as rain relayed harvest and oil and meal market advance supported raw bean values. Illinois crusher point prices went 34-40 cents higher at \$5.75 to \$5.83 per bushel. Minneapolis flaxseed held at \$7.25 per bushel and sunflower seed traded unchanged at \$13.25 at Minneapolis and \$13.50 per cwt at Duluth.

AGRICULTURE HIGHLIGHTS

FOR WEEK ENDED SEPTEMBER 8-14

Subnormal temperatures across much of the Eastern half of the Nation brought scattered frost as far south as northern Illinois and Indiana. Frost damage to row crops was insignificant in most areas although there was some loss in low lying sections. Spring wheat harvest gained momentum in near rain-free Northern Plains and Pacific Northwest.

SMALL GRAINS:

Favorable conditions aided small grains in harvest in most of the Northern states.

Winter wheat combining was in it's final stage in all the states. Harvest was 90 percent done in Montana and 75 percent in Idaho.

Spring wheat harvest reached 86 percent completion by September 14th which is much behind normal. Combining made normal progress in most of the remaining areas and was 60 percent done in Montana, 88 percent in North Dakota and 90 percent in Minnesota.

Seeding of the 1976 winter wheat crop was over 10 percent finished by September 14th. Kansas 10 percent was in ground about normal. In Texas only 13 percent had been seeded much behind normal 49 percent and 6 percent Oklahoma behind usual 12 percent.

CORN:

Development of corn continued at an excellent pace despite subnormal temperatures over major producing areas. Frost damage was light except in low lying areas in several northern states. Harvest of this year's corn for grain made good progress with about 5 percent out of the field.

In the North Central states nearly two-thirds of corn was mature and safe from frost about double progress of 1974 crop. Illinois corn was 90 percent mature versus 39 percent in 1974 and an average 53 percent. Iowa crop was 72 percent safe from frost compared with 42 percent in 1974 and the usual 57 percent. Corn was 55 percent mature in Ohio and 40 percent both in Indiana and Nebraska. Harvest started in Nebraska and Ohio continued in Indiana was 5 percent finished in Illinois and 15 percent complete in Missouri.

Corn harvesting continued in the South where weather permitted. North Carolina is 22 percent harvested, 24 percent in Alabama, 25 percent in Georgia, 30 percent in Texas and 43 percent in South Carolina.

SOYBEANS:

Soybean development continued at a steady pace even though cooler temperatures dominated much of the major growing area. Scattered light frost hit several North states but the damage was insignificant in most regions.

In many areas of North Central states much of the crop has leaves shedding and early fields have reached maturity. In Illinois 60 percent of the soybeans were shedding leaves against only 10 percent in 1974 and the normal 21 percent, 8 percent of the crop was harvested much ahead of 1974 and average. In Iowa 30 percent of the soybeans were shedding leaves versus 17 percent in 1974 and the usual 33 percent. Soybeans were 20 percent mature in both Ohio and Minnesota, 12 percent in Missouri and 10 percent in Indiana. Harvest was also underway in Ohio 5 days ahead of average in Indiana and 3 percent finished in Missouri.

Rain improved the soybean prospects in Arkansas and early fields are maturing rapidly throughout much of southern growing area.

WEEKLY
SUMMARY
AND
STATISTICS

September 26, 1975

WHEAT AND FEED GRAIN MARKETS MOSTLY LOWER

Wheat and feed grain markets turned mostly lower across the Nation during the week ended September 25. Slowed export activity in wheat and feed grain and good pastures providing much of livestock feed requirements kept trade dull until the closing day of the period. At the close, traders showed more interest in buying grain for nearby and forward positions when prospects for increased grain exports improved and feedlots started filling with cattle for winter feeding.

Kansas City hard winter wheat traded much stronger on Thursday after declining all week to close 1-5 cents lower with ordinary protein at \$4.29 and 13 percent at \$4.60 per bushel. Chicago soft red winter wheat finished steady at \$4.18 and Toledo soft white wheat ended 2 cents lower at \$3.87 per bushel. Portland soft white wheat moved 6 cents lower at \$4.43 with hard winter ordinary at \$4.43 and dark northern spring 14 percent protein down 12 cents at \$5.38 per bushel.

Minneapolis dark northern spring wheat finished weaker as Duluth port continued congested and ordinary protein fell 3 cents at \$4.13, 14 percent closed 2 cents lower at \$4.88 and medium milling quality hard amber durum traded unchanged to 10 cents lower at \$6.15 to \$6.25 per bushel. Light receipts of rye sold 15 cents higher at \$3.05 per bushel.

Corn markets fell sharply as harvest got underway but cool, damp weather slowed combining and prices recovered part of the loss at the close. Kansas City white corn fell 10 cents at \$2.95 and Chicago No. 2 yellow corn went down 15-16 cents at \$2.94 to \$2.98 per bushel. Chicago white oats went down 3 cents at \$1.45 per bushel.

Minneapolis best malting barley, 70 percent or better plump traded steady to 20 cents lower at \$3.70 to \$4.00 due to heavy arrivals and feed grade declined 10 cents at \$3.00 per bushel. Kansas City sorghum finished 5 cents lower at \$4.70 and Texas High Plains sorghum fell 10 cents at \$4.90 to \$5.00 per hundred pounds.

Chicago No. 1 yellow soybean market declined all week until oil markets turned stronger on Thursday to restore part of the drop. Chicago No. 1 yellow soybeans ended 10 cents lower at \$5.66 and Illinois Crusher Point prices fell 12-17 cents at \$5.63 to \$5.66 per bushel. Minneapolis flaxseed held steady at \$7.25 per bushel. Sunflower seed traded 75 cents lower at \$12.50 Minneapolis and \$12.75 per hundred pounds delivered Duluth.

ROUNDUP OF WORLD PRODUCTION AND TRADE

AS OF SEPTEMBER 23, 1975

The grain harvest in the Soviet Union is progressing satisfactorily but is behind the pace of last year. The grain area cut totaled 99.8 million hectares (a hectare equals 2.47 acres), or 81 percent of the area sown, compared with 88 percent on that date last year. Threshing had been completed on 95.5 million hectares.

Meanwhile, the seeding of winter grains in the Soviet Union moved ahead of last year's pace, with 22.6 million hectares sown about 3 million hectares more than a year ago.

This year's Soviet target for winter grains is 35 million hectares, about the same as the target in 1974, when only 33.7 million hectares were actually sown.

Elsewhere in the grain sector, the Argentine Ministry of Agriculture has increased it's estimates of the area sown to wheat for 1975/76 to 5.745 million hectares. This is 125,000 more than the earlier estimate and 11 percent above the acreage in 1974/75. Good weather is credited for the increase, allowing farmers to plant more than previously indicated.

The new estimate is 17 percent above the average planted area of the past five years and 2.5 percent above the recent 10-year average.

Yugoslavia's 1975 corn crop is turning out better than expected, and is now forecast at a record 8.5 million metric tons, which is 500,000 tons higher than the previous estimate.

However, official wheat production estimates have been reduced to 4.4 million tons, down 300,000 from the previous estimate and almost a third below production in 1974. Despite the smaller wheat crop, indications are that Yugoslavia will not need to import wheat in the 1975/76 season because of large stocks accumulated from the record 1974 crop.

Trade sources put Sweden's 1975 wheat crop at 1.5 million metric tons. This estimate is below the record 1974 harvest of 1.8 million ton, but is 300,000 greater than previously estimated, and would increase the amount of Swedish wheat available for export to about 800,000 tons. Sweden has already committed 500,000 tons for export to Norway and Algeria, and for use by the Swedish International Development Authority. Wheat exports last year totaled about 1 million tons.

Feed buyers currently are showing a preference for sorghum over corn in the Rotterdam market, where sorghum, mainly of U.S. origin, is selling a \$9.30 per metric ton below corn in a landed EC levy-paid basis for January-March delivery. An important factor is that there is no forward fixing of import levies for corn while there is for sorghum, so sorghums are selling at well below threshold prices while corn must be sold at about the threshold price level.

STATISTICS

October 3, 1975

WHEAT AND FEED GRAINS WEAKER

Wheat and feed grain markets turned weaker across the country during the week ended October 2. Lack of important new export business and hand to mouth buying for domestic needs coupled with expanding harvest of record crops of corn, soybeans, and grain sorghum kept markets relatively inactive and prices fell sharply at the close. Farmers sold freely early in the period on moderate price rise but turned back to the tight holding pattern as price drops hit the country elevator level. Feeder interest showed a light pickup as cooler weather moved into most areas but buying remained for nearby positions.

Kansas City hard winter ordinary protein wheat closed 21 cents lower at \$4.08 with 13 percent down 17 cents at \$4.43 per bushel. Chicago soft red winter went down 27 cents at \$3.91 and Toledo soft white wheat fell 25 cents at \$3.62 per bushel. Portland soft white wheat moved 11 cents lower at \$4.32, hard winter ordinary protein also 11 cents lower at \$4.32 and dark northern spring 14 percent protein traded 6 cents lower at \$5.32 per bushel.

Minneapolis dark northern spring ordinary protein wheat traded off 15-18 cents at \$3.95 to \$3.98 with 14 percent 11-16 cents lower at \$4.72 to \$4.74 per bushel. Medium milling hard amber durum sold down 15 cents at \$6.00 to \$6.10 per bushel. Rye wheat went up 5 cents at \$3.10 with mills taking the light offerings.

Yellow corn declined as harvest expanded but light offerings of white corn kept that market firm. Kansas City No. 2 white corn traded unchanged at \$2.95 per bushel. Chicago No. 2 yellow corn went down 10-14 cents at \$2.84 per bushel in box cars and hopper cars. Chicago No. 2 white oats dropped 8 cents at \$1.37 per bushel.

Minneapolis best malting barley, 70 percent or better plump held steady at \$3.70 to \$4.00 but feed grade fell 17 cents at \$2.83 per bushel. Los Angeles No. 2 western barley traded steady to 3 cents lower at \$2.93 to \$2.95 per bushel.

Sorghum traded firmly most of the week as export interest picked up and feeder demand expanded but at the close sorghum followed corn lower and Kansas City market fell 5 cents at \$4.65 per hundred pounds. Texas High Plains sorghum declined 15-25 cents at \$4.75 per cwt.

Soybean markets moved lower as harvest expanded rapidly and demand turned sluggish. Several export tenders were delayed and processors bought on an as needed basis only. Chicago No. 1 yellow soybeans declined 32 cents at \$5.34 and Illinois crusher point prices fell 31-39 cents at \$5.24 to \$5.35 per bushel. Minneapolis flaxseed held unchanged at \$7.25 per bushel but sunflower seed dropped 60-75 cents at \$11.90 Minneapolis and \$12.00 per hundred pounds at Duluth.

AGRICULTURE HIGHLIGHTS

FOR WEEK OF SEPTEMBER 22-28

Subnormal temperatures slowed row crop maturity over much of the main growing area while strong winds and heavy rains occurred across much of the Eastern third of the Nation. Hot dry weather over most of the West allowed good harvest progress.

Corn, cotton, sorghum and soybean harvest gained momentum as weather conditions permit.

SMALL GRAINS: Small grain harvest is moving into the final stages as dry conditions in the northern plains and mountain states favored good harvesting progress.

SPRING WHEAT: Combining on September 28th was 97 percent completed. Harvest was 98 percent finished in North Dakota and ahead of both 1974 and the average progress; while in Montana and Idaho, where combining continues, harvest is normally complete.

Seeding of the 1976 winter wheat crop was 37 percent finished by September 28th. In Kansas 45 percent of the crop had been seeded equal to normal progress. Wheat seeding in Texas was 34 percent done, much behind the 55 percent in 1974 and the normal 73 percent. Oklahoma winter wheat seeding reached 21 percent completion versus 38 percent in 1974.

CORN: Development of late corn was hampered by subnormal temperatures while harvest was gaining momentum. By September 28th 11 percent of the 1975 corn for grain was harvested ahead of the 8 percent for both 1974 and the normal.

In the North Central States corn for grain harvest was 8 percent finished twice the 1974 level and slightly ahead of the average 5 percent. Scattered frosts damaged the corn in Northern Iowa, Kansas, Minnesota and Nebraska. Growers in many areas are waiting for hard frost to aid drying and combining. Illinois harvest was 12 percent completed and in Iowa 5 percent done, both were much ahead of the 1974 level. Harvest was slow in Ohio and Indiana but advanced well in Kansas, Missouri and Nebraska.

Hurricane Eloise limited corn combining in most Southern States. Harvest was 35 percent finished in the South Atlantic States and 25 percent in South Central Region.

COTTON: Wind and heavy rain associated with Hurricane Eloise and hit several producing areas while subnormal temperatures continued to slow development.

SOYBEANS: Cool temperatures continued to limit soybean development over most of the major producing areas. Harvest of the 1975 crop was 8 percent complete on September 28th, ahead of both 1974 and normal.

In the North Central States harvest was 11 percent finished versus 9 percent in 1974 and 8 percent normal. Illinois harvest advanced to 26 percent complete, far ahead of the 5 percent in 1974 and 8 percent average. Soybean harvest reached 5 percent in Indiana and Iowa, 6 percent Missouri, 12 percent in Minnesota and 15 percent Nebraska. Wet fields limited the activity in Ohio.

In the South combining is in early stages and was limited by wet cool weather in many areas. Harvest was slow in Arkansas, 3 percent done in Mississippi, 4 percent in Kentucky and 9 percent in Louisiana.

SORGHUM: Harvest made good progress and in 7 major states combining was 41 percent done by September 28th and ahead of the 30 percent in 1974 and normal. Harvest ranged from 64 percent finished in Texas to only 10 percent in South Dakota. Major harvest is not yet underway in Colorado.

WEEKLY
SUMMARY
AND
STATISTICS

October 10, 1975

WHEAT HIGHER, FEED GRAINS MOVED MIXED

Wheat closed generally higher and feed grains moved in a mixed price trend across the Nation during the week ended October 9. Trade continued light with buyers searching for solid news to give them direction and with farmers holding tightly to grain in storage. No concrete new Russian business coupled with slow ship arrivals kept markets off balance in spite of continued negotiations with Russia and fairly good business to Bangladesh and other countries for wheat and fair corn sales to several countries in recent days. Soybean export business slowed with barge congestion at Gulf Ports as ship arrivals were too slow to clear the downriver shipments. Domestic flour business showed strong improvement and mills bought wheat to replace grind.

Kansas City hard winter wheat moved higher on good mill demand and tight farmer holding. Ordinary protein wheat traded up 3 cents at \$4.11 and 13 percent protein gained 4 cents at \$4.47 per bushel. Chicago soft red winter wheat closed 4 cents higher at \$3.95 in spite of accumulating wheat stocks at elevators. Toledo soft white wheat went up 7 cents at \$3.69 as stocks posted a sizeable decline. Portland soft white wheat fell 11 cents at \$4.21 per bushel as Japan completed nearby business and no immediate new sales were expected in the market. Hard winter ordinary protein also 11 cents lower at \$4.31 and 14 percent protein dark northern spring traded 11 cents lower at \$5.21 Portland. Minneapolis spring wheat moved 1-8 cents higher with best strength in the higher proteins needed to mix with low protein hard winter wheat for milling. Ordinary protein went up 1-2 cents at \$3.96 to \$4.00 with 15 percent protein up 8 cents at \$5.00 to \$5.04 per bushel. No. 1 hard amber durum closed unchanged at \$6.00 to \$6.10 but No. 2 rye went down 5 cents at \$3.05 per bushel.

Yellow corn markets moved higher as farmers held old and new crop corn tightly and feeder interest improved along with fair sales for export. Chicago No. 2 yellow corn moved up 6-8 cents at \$2.90 to \$2.92 and Toledo market rose 3 cents at \$2.76 per bushel. Kansas City No. 2 white corn by rail fell 5 cents at \$2.90 but truck arrivals at Kansas City went up 5 cents at \$3.05 and Atchison truck white corn advanced 10 cents at \$3.05 per bushel with processors needing nearby supplies to maintain grind. Chicago No. 2 heavy white oats closed 2 cents lower at \$1.35 in slow trade.

Minneapolis best malting barley, 70 percent or better plump, held at \$3.70 to \$4.00 but feed grade barley advanced 2 cents at \$2.90 per bushel. Sorghum harvest moved along with increasing tempo and heavy receipts at Kansas City moved prices 10 cents lower at \$4.55 per hundred rounds. Nearby buying interest slowed but Texas High Plains sorghum traded 5 cents higher at \$4.80 for October delivery. Los Angeles sorghum fell 6 cents at \$5.96 to \$6.01 per cwt.

Soybean markets moved mixed with export demand spotty and selective as to port and shipment date as barges in port exceeded ship arrivals at New Orleans. Processors needed beans for crushing but farmers sold sparingly. Chicago No. 1 yellow soybeans finished up 1 cent at \$5.35, Toledo market 6 cents lower at \$5.24 and Illinois Crusher Point prices 9 cents higher at \$5.33 to \$5.36 per bushel. Minneapolis flaxseed dropped 15 cents at \$7.10 per bushel with sunflower seed 15 cents lower at \$11.75 at Minneapolis and unchanged at \$12.00 per hundred pounds at Duluth.

	UNIT OF VALUE	October 9, 1/ 1975	October 2, 1/ 1975	October 10, 2/ 1974
Soybean oil, crude, tank cars and trucks,				
Price at Decatur, Illinois	Cents per lb.	23.05	23.30	45.00
Oil yield per bushel crushed	Pounds	10.55	10.55	10.92
Value from bushel of soybeans	Dollars	2.43	2.46	4.91
Soybean meal, 44% protein unrestricted,				
Price at Decatur, Illinois, Bulk	Dollars per ton	132.50	132.00	181.50
Meal yield per bushel crushed	Pounds	47.81	47.81	47.60
Value from bushel of soybeans	Dollars	3.17	3.16	4.32
Value of oil and meal from bushel of soybeans	Dollars	5.60	5.62	9.23
Soybeans, No. 1 yellow				
Truck price paid at Central Illinois points by processors	Dollars per bu.	5.34	5.30	8.78
Difference between soybean price and value of oil and meal	Cents	26	32	45

Based on crushings and production of soybean meal and oil at oil plants reported by Bureau of the Census for 1/ August 1975 and 2/ October 1974

This table is presented for statistical comparison and is not intended to indicate operating margins.

CASH GRAIN PRICES
Dollars per bushel except sorghum per cwt.

1/ The quantity of grain inspected at U.S. ports for shipment to Canada is reduced by the amount of U.S. grain exported from Canadian ports as reported by Canadian Grain Commission. It is assumed this residual amount of grain is held in Canada for later export of consumption.

2/ Revised

3/ Includes 63,000 Bushels shipped from Pacific Ports

WHEAT: Inspections for export by classes, programs, coastal areas, and country of destination,

WEEKLY
SUMMARY
AND
STATISTICS

October 17, 1975

WHEAT AND FEED GRAIN MARKETS MOSTLY LOWER

Slowed export sales depressed wheat and feed grain markets across the Nation during the week ended October 16. Markets moved unevenly all week searching for direction as export sales to Russia continued to be delayed and sales to Poland were set to resume. Other countries bought or tendered for fair amounts of wheat and feed grains but volume remains light in view of the large crops harvested or in progress. Lack of rain delayed germination of wheat dusted in earlier in the dry Southwest and delayed further planting of winter wheat in that area. Midwestern farmers followed soybean and sorghum harvest with winter wheat planting. Feeding continued hand to mouth but flour mills ran heavy schedules.

Kansas City hard winter wheat declined 3 cents with ordinary protein at \$4.08 and 13 percent protein at \$4.44 per bushel. Soft red winter wheat advanced a penny at \$3.92 when fair export business went to Bangladesh with possibility of additional sales to that country and possibly to Egypt. Domestic mills bought some soft red winter for blending.

Chicago soft red winter wheat closed 4 cents higher at \$3.99 in spite of accumulating stocks of grain. Toledo soft white wheat fell 5 cents at \$3.64. Minneapolis spring wheat moved mixed with ordinary protein down 5-6 cents at \$3.91 to \$3.94, 14 percent off 5 cents at \$4.67 to \$4.71 but 15 protein advanced 3 cents at \$5.03 to \$5.07 per bushel. Medium milling quality hard amber durum fell 20-30 cents at \$5.70 to \$5.90 and rye traded unchanged at \$3.05 per bushel.

Portland soft white wheat went up 8 cents at \$4.29 as timely ship arrivals helped clear some of the congestion in port. Hard winter ordinary protein wheat went up 9 cents and dark northern spring 14 percent protein moved up 7 cents at \$5.28 per bushel.

Corn markets fell sharply under harvest pressure as storage facilities filled rapidly and some grain was piled on the ground. Chicago No. 2 yellow corn went down 15-17 cents at \$2.75 in box or hopper cars. Kansas City yellow corn dropped 11 cents at \$2.77 but white corn went 5 cents higher at \$2.95 per bushel with good processor interest. Chicago heavy white oats traded 3 cents lower at \$1.32 per bushel.

Minneapolis best malting barley 70 percent or better plump held at \$3.70 to \$4.00 and feed grade sold unchanged at \$2.90 per bushel. Los Angeles feed barley held at \$2.90 to \$2.93 per bushel. Kansas City rail sorghum moved up 5 cents at \$4.60 with improved feed lot usage but Texas High Plains market fell 10 cents at \$4.70 per hundred pounds.

Chicago No. 1 yellow soybeans went 32 cents lower at \$5.03 per bushel with harvest heavy but with little trading. Product movement continued slow. Illinois crusher point prices fell 18-19 cents at \$5.14 to \$5.18 per bushel. Minneapolis flaxseed moved steadily at \$7.10 per bushel but sunflower seed dropped 30 cents at \$11.45 Minneapolis and fell 35 cents at \$11.65 per hundred pounds at Duluth.

WEEKLY
SUMMARY
AND
STATISTICS

October 24, 1975

WHEAT AND FEED GRAIN MARKETS WEAK

Lower prices for wheat and feed grains across the Nation reflected trade disappointment in volume of grain included in Russian trade agreement, heavy harvest pressure and a generally slow demand for all grains during the week ended October 23. Fall grain harvest made good progress and as farm storage filled some corn was stored on the ground and elevators sold heavily in order to make room for the new crop. Hedging pressure at terminal markets forced futures prices lower in spite of fairly good interest from mills, processors and export firms. Flour mill grind continued heavy and mills reported difficulty in replacing stocks at current bid prices. Farmers sold only grain which they could not store. Light rain over dry areas at the end of the period improved new crop wheat prospects.

Kansas City hard winter wheat moved lower with ordinary protein down 6 cents at \$4.02 and 13 percent off 4 cents at \$4.40 per bushel. Chicago soft red winter wheat declined 27 cents at \$3.72 and Toledo soft white wheat traded 16 cents lower at \$3.48 per bushel. Portland soft white wheat moved 15 cents lower at \$4.14 with hard winter ordinary protein 11 cents lower at \$4.29 and 14 percent protein dark northern spring 15 cents lower at \$5.13 per bushel.

Minneapolis dark northern spring wheat declined less than other wheat as the higher protein wheat was sought for blending. Dark northern spring ordinary protein eased 4 cents lower at \$3.87 to \$3.90 with 14 percent protein 1 cent lower at \$4.66 to \$4.70 per bushel. Medium milling quality hard amber durum wheat went down 5-10 cents under heavy selling with closing price at \$5.65 to \$5.80 per bushel. Rye offerings were of less than desired quality and traded 5 cents lower at \$3.00 per bushel.

Yellow corn moved sharply lower under harvest pressure and slow demand. Chicago No. 2 yellow corn fell 12 cents at \$2.63 with Kansas City market 11 cents lower at \$2.66. Kansas City white corn held at \$2.95 in light trade. Chicago white oats moved up 8 cents at \$1.40 per bushel with out of town interest taking the light offerings.

Minneapolis 70 percent or better plump malting barley held at \$3.70 to \$4.00 but feed grade barley traded 10 cents lower at \$2.80 per bushel in light trade. Los Angeles feed barley dropped 2-3 cents at \$2.88 to \$2.90 per bushel. Kansas City sorghum declined 20 cents at \$4.40 per cwt and Texas High Plains market fell 15 cents at \$4.55 and the Los Angeles market also 15 cents lower at \$5.75 to \$5.80 per hundred pounds.

Chicago No. 1 yellow soybeans dropped 40 cents reflecting the fall in November futures option price since the basis held unchanged. Closing bids were at \$4.63 per bushel with heaviest movement of the year as harvest rapidly approached completion in corn belt states. Illinois crusher point prices went down 37 to 39 cents at \$4.77 to \$4.79 per bushel. Minneapolis flaxseed traded 15 cents lower at \$6.95 per bushel. Sunflower seed traded 10 cents higher at \$11.45 Minneapolis and \$11.75 per cwt at Duluth.

WEEKLY
SUMMARY
AND
STATISTICS

October 31, 1975

WHEAT MARKETS STRONG - FEED GRAINS MIXED

Wheat markets turned strong across the Nation during the week ended October 30, 1975. Worsening drought conditions across the western half of the winter wheat area coupled with tight holding of old crop wheat at the farm level, contributed strength to wheat markets. Good ship clearances for grains and additional sales of corn to Russia countered weakness in feed grain markets caused by near ideal harvest weather for corn, soybeans and sorghum. Shortage of rail transportation and storage facilities put some downward pressure on feed grain markets.

Kansas City hard winter wheat moved higher with good flour mill and export interest competing for scarce offerings. Hard winter ordinary protein advanced 6 cents at \$4.08 with 13 percent up 8 cents at \$4.48 and soft red winter followed with an 8 cent advance at \$3.86 per bushel. Chicago soft red winter closed up 3 cents at \$3.75 and Toledo soft white wheat moved 12 cents higher at \$3.60 per bushel.

Portland soft white wheat closed 5 cents higher at \$4.19 with hard red ordinary protein up 10 cents at \$4.39 and dark northern spring 14 percent protein up 7 cents at \$5.20 per bushel.

Minneapolis dark northern spring wheat moved higher with ordinary protein wheat up 2-4 cents at \$3.91 to \$3.92 and 14 percent protein up 6 cents at \$4.72 to \$4.76 per bushel. Medium milling quality hard amber durum moved steady to 5 cents higher at \$5.70 to \$5.80 per bushel but rye dropped 15-25 cents at \$2.75 to \$2.85 with resale offers depressing the market.

Chicago No. 2 yellow corn went down 3 cents at \$2.60 as offerings expanded with good harvest weather and tight storage forcing some grain on the market. Kansas City white corn held at \$2.95 in dull trade with processors and merchandizers comfortable in their position at the present time. Local truck bids were withdrawn and Topeka truck bid fell 10 cents at \$3.00 per bushel. Chicago white oats advanced 4 cents at \$1.44 per bushel reflecting mill and export interest in the Minneapolis-Duluth area. Barley markets fell sharply as brewing declined toward the winter low point and offerings turned heavy. Minneapolis best malting barley, 70 percent or better plump dropped 15-20 cents at \$3.50 to \$3.85 and feed grade barley fell 20 cents at \$2.60 per bushel. Stockton western barley traded 5 cents lower at \$2.85 to \$2.88 per bushel.

Kansas City No. 2 sorghum closed unchanged at \$4.40 per cwt with renewed export interest at the close. Texas High Plains sorghum fell 10 cents at \$4.45 and Los Angeles market dropped 15 cents at \$5.60 to \$5.65 per hundred pounds. Chicago No. 1 yellow soybeans recovered mid week losses and posted a 3 cent advance at the close at \$4.66 per bushel as export interest in beans and meal added strength. Illinois crusher point soybeans finished 7 cents lower to 1 cent higher at \$4.70 to \$4.80 per bushel. Minneapolis flaxseed declined 10 cents at \$6.85 per bushel and farm selling dropped sharply at the close. Sunflower bids fell 45 cents due to harvest pressure and embargoes at Duluth-Superior ports.

WEEKLY
SUMMARY
AND
STATISTICS

November 7, 1975

WHEAT LOWER, FEED GRAINS MIXED

Wheat traded sharply lower but feed grains moved in a mixed price trend across the Nation during the week ended November 6. Wheat trade slowed as farmers held stocks tightly and new export sales held at low levels.

Mill interest continued strong but current price levels encouraged farmer holding. Feed grain markets received strength at the close of the period when trade sources indicated Russia might have purchased one million tons of corn from a U.S. exporter and 1/3 million tons of soybeans from Brazil, with no confirmation of either transaction.

Kansas City hard winter wheat closed 16-18 cents lower with ordinary protein at \$3.90 and 13 percent protein at \$4.32 per bushel. Recent export sales of 12 percent protein wheat prompted exporters and mills to offer increased premium schedules for the higher protein wheat. Chicago No. 2 soft red winter wheat fell 22 cents at \$3.53 with new crop progress showing improvement from recent moisture and mild weather. Toledo soft white wheat went down 18 cents at \$3.42.

Portland soft white wheat declined 16 cents at \$4.03, hard winter ordinary fell 16 cents at \$4.23 and dark northern spring 14 percent protein dropped 15 cents at \$5.05 per bushel. Winter wheat prospects improved as rains fell over much of the dry areas.

Minneapolis wheat markets turned inactive due to lack of new export business and prices dropped 21-28 cents with dark northern spring ordinary protein at \$3.63 to \$3.65 and 14 percent protein at \$4.51 to \$4.53 per bushel. Medium milling quality hard amber durum traded 20 cents lower at \$5.50 to \$5.60 and rye moved unchanged to 5 cents lower at \$2.80 to \$2.85 per bushel.

Yellow corn traded mixed with late period strength evolving from trade rumors of additional corn sold to Russia. Chicago No. 2 yellow corn moved up 3 cents at \$2.63 per bushel. Harvest neared completion but rail and storage facilities remain congested. Kansas City white corn fell 20 cents at \$2.75 per bushel as local processors had ample stocks on hand. Chicago white oats moved up 4 cents at \$1.48 per bushel with the strong Minneapolis market supporting the advance.

Minneapolis best malting barley, 70 percent or better plump traded 10-20 cents lower at \$3.30 to \$3.75 with Malsters' storage stocks good. Feed grade barley moved 10 cents lower at \$2.50 in spite of light arrivals as little buying interest showed. Kansas City sorghum went up 5 cents at \$4.45 per hundred pounds with renewed buying interest at \$5.05 delivered track gulf for export and some pickup in feeder demand at the current \$3.00 per ton discount to corn. Texas High Plains sorghum held at \$4.45 with practically no trade.

Soybean markets firmed after harvest neared completion and farmers held tightly. Chicago No. 1 yellow soybeans advanced 14 cents at \$4.80 and Illinois crusher point prices went up 7-11 cents at \$4.81 to \$4.87 per bushel. Minneapolis flaxseed fell 85 cents at \$6.00 with processors not bidding for stocks. Sunflower seed dropped 30 cents per cwt at \$10.80 Minneapolis and \$11.00 delivered Duluth.

AGRICULTURE HIGHLIGHTS

WEEK OF OCTOBER 27 - NOVEMBER 2

AGRICULTURE HIGHLIGHTS:

Harvest of row crops continued to make good advancement. Nationwide corn for grain was 82 percent harvested and soybeans were three-fourths finished, much ahead of normal. Winter wheat seeding reached 86 percent finished. Rains aided germination and assured stands in many of previously dry areas.

SMALL GRAINS:

Rain in varying amounts over much of Southern Great Plains should help previously dusted in wheat and promote growth in areas to be used for winter pasture, by November 2 seeding of 1976 winter wheat crop reached 86 percent complete trailing 1974 and normal levels of 89 percent.

Rains eased dry conditions in the eastern two-thirds of Kansas and much of Oklahoma and Texas; however, dry western areas of Kansas and Oklahoma Panhandle's and the Western High Plains of Texas still need rain. Seeding was only 95 percent complete in Kansas, 91 percent in Texas and 81 percent in Oklahoma behind 1974 and normal levels in all three states. Wheat condition ranges from poor in the dry areas of the Great Plains to mostly good in the Eastern North Central States.

CORN:

Aided by above normal temperatures corn harvesting made excellent progress in most of the major states. Harvest of the nation's corn crop advanced 14 points from previous week to 82 percent finished by November 2, far ahead of the 62 percent last year and the average 58 percent.

In North Central States the corn harvest was 83 percent complete out pacing 59 percent a year ago and normal 55 percent. Harvest surpassed four-fifths mark in eight of eleven states in this region. Last year harvest in only two states had reached this point. Corn harvest was furthest ahead in Minnesota at 92 percent finished. In Iowa combining made excellent progress even though many storage facilities are full. Harvest was 87 percent complete versus only half done in 1974. Illinois corn reached 85 percent finished against only 47 percent a year ago.

Harvest in South Atlantic States was 81 percent complete while harvest in the South Central advanced to 75 percent.

SOYBEANS:

Soybean combining continued to make good progress in many major areas and by November 2 harvest was 75 percent finished nationwide versus 68 percent in 1974 and an average 65 percent.

In North Central States harvest reached 94 percent complete ahead of last years 85 percent and the usual 81 percent. Combining virtually complete in Illinois, Iowa, Minnesota, Nebraska and South Dakota and was 75 percent complete in Kansas 82 percent in Missouri and 90 percent in Ohio. Drying rates and above normal rainfall slowed harvesting in Indiana.

Harvest in the South jumped 12 points to 42 percent complete still ahead of last year and the normal. Combining was 45 percent finished in Mississippi and half done in Arkansas. Progress ranged from only 12 percent done in North Carolina to 75 percent in Texas.

OTHER CROPS:

Sorghum grain harvesting continued much ahead of last year and normal in the seven major states. By November 2 combining was 91 percent finished versus 56 percent in 1974 and the average 73 percent. Harvest was virtually complete in Nebraska and South Dakota, 96 percent in Texas and 80 percent in Kansas.

PASTURES AND LIVESTOCK:

Rain and above normal temperatures improved pasture conditions in many areas and brightened prospects for winter grazing on wheat fields in the Southern Great Plains. Livestock are making good use of corn stalks in areas where harvest is complete. Movement of livestock to winter pasture continues in several states but supplemental feeding is necessary where pasture feed is short. Winter supplies are adequate in most states but hay supplies vary from area to area.

STATISTICS

November 14, 1975

WHEAT MARKET WEAK - FEED GRAINS FOLLOW

Feed grain prices followed wheat markets lower across the Nation during the week ended November 13. Lack of important new export business coupled with reports of moisture over dry hard winter wheat areas depressed prices and kept exporters and other commercial buyers on the sidelines or in the selling side of business. As wheat markets went down, weakness spread to feed grains. Farmer holding continued fairly tight but with some wheat sold toward the close and hedging pressure on futures markets depressed prices further.

Kansas City hard winter wheat showed weakness throughout the period and the weakness accelerated at the close when farmers sold moderate amounts of hard winter wheat after fair moisture fell over part of the dry Panhandle areas of the hard winter wheat area. Kansas City hard winter ordinary protein wheat traded 26 cents lower at \$3.64 with 13 percent protein at \$4.06 per bushel. Chicago soft red winter wheat fell 13 cents at \$3.40 and Toledo soft white wheat fell 27 cents at \$3.15. Portland soft white wheat dropped 26 cents at \$3.77 with ordinary protein hard winter wheat off 28 cents at \$3.95 and dark northern spring 14 percent protein 23 cents lower at \$4.82 per bushel.

Minneapolis spring wheat fell 22 to 26 cents with ordinary protein at \$3.37 to \$3.39 and 14 percent at \$4.25 to \$4.27 per bushel. Medium milling quality hard amber durum wheat declined 55 to 60 cents at \$4.90 to \$5.05 per bushel as buying interest declined sharply. Rye held unchanged at \$2.80 to \$2.85 in light trade.

Corn markets fell lower as farmer selling of corn not under permanent storage caused basis cuts and futures market weakness at Chicago. Chicago No. 2 yellow corn traded 11 cents lower at \$2.52 but most interior markets showed smaller losses as harvest now virtually complete and most corn is now stored. Kansas City No. 2 white corn moved 5 cents lower at \$2.70 per bushel in light trade. Chicago heavy oats held at \$1.48 per bushel.

Minneapolis best malting barley 70 percent or better plump moved unchanged to 10 cents higher at \$3.40 to \$3.75 per bushel but feed grade barley dropped 10 cents at \$2.40 per bushel. Kansas City sorghum went down 15 cents at \$4.30 per cwt and Texas High Plains market dropped 12 to 15 cents at \$4.30 to \$4.33 with bids dropping at the close.

Chicago No. 1 yellow soybeans dropped 13 cents at \$4.67 per bushel with stocks accumulating at Chicago and some interior processing plants embargoed against new rail receipts due to congested track facilities. Illinois crusher plant bean bids fell 15 cents at \$4.66 to \$4.72 per bushel. Sunflower seed prices fell \$1.00 per hundred pounds as Duluth terminals and processing plants became filled. Prices closed at \$9.80 Minneapolis and \$10.00 at Duluth.

WEEKLY
SUMMARY
AND
STATISTICS

November 21, 1975

WHEAT AND FEED GRAINS MOSTLY LOWER

Wheat and feed grains traded mostly lower across the Nation during the week ended November 20. Lack of important new export sales of wheat and feed grains coupled with fair rains over dry areas of the winter wheat area and congestion at port facilities kept buying interest low and farmer holding continued unabated except for some wheat sales at mid period on a sharp market break. Flour mills competed with exporters for high protein offerings and this advanced quotes for 15 percent protein dark northern spring wheat at Minneapolis. Farmer holding of corn forced spot price improvements when exporters needed small amounts to complete ship loadings.

Kansas City hard winter wheat prices slid 15 cents lower with ordinary protein at \$3.48 and 13 percent at \$3.90 per bushel. Flour mills needed wheat to replace heavy grind but followed the market down as export demand slowed and resulting sales were limited to spots of sharp market downturn. Chicago soft red winter wheat closed 7 cents lower at \$3.32 and Toledo soft white wheat went down 4 cents at \$3.11 per bushel.

Portland soft white wheat fell 14 cents at \$3.63 while hard winter ordinary protein wheat declined 17 cents at \$3.78 and dark northern spring 14 percent protein closed 10 cents lower at \$4.72 per bushel.

Minneapolis dark northern spring wheat finished mixed with 15 percent protein up 2 cents at \$4.61 to \$4.67 and ordinary protein down 6 cents at \$3.31 to \$3.33 with activity limited by congested port facilities. Medium milling quality hard amber durum traded unchanged to up 15 cents at \$4.90 to \$5.20 per bushel and renewed mill buying put rye up 10 to 15 cents at \$2.95 per bushel.

Chicago No. 2 yellow corn advanced 4 to 8 cents in spite of declining futures price as buyers advanced the basis to draw out tightly held farm stocks. No. 2 yellow corn closed at \$2.56 to \$2.60 per bushel for box and hopper cars. Kansas City No. 2 white milling quality corn held at \$2.70 in dull trade. Chicago No. 2 oats advanced 8 cents at \$1.56.

Minneapolis No. 3 or better malting barley 70 percent or better plump held at \$3.40 to \$3.75 with a firm undertone due to reduced country selling. Feed grade barley fell 20 cents at \$2.20 per bushel in an inactive market. Kansas City sorghum went 8 cents lower at \$4.22 per hundred pounds with trade dependent on export interest which declined under embargoes at ports and congestion at river terminals as ships failed to arrive in adequate numbers to clear the harbors. Texas High Plains sorghum traded 5 to 8 cents lower at \$4.20 to \$4.25 but volume extremely light.

Soybean markets closed lower in spite of a late week rally on the Chicago Futures Board. Markets lacked firm direction in spite of light country selling and Chicago No. 1 yellow soybeans moved down 5 cents at \$4.62 and Illinois crushing plant prices fell 13 to 15 cents at \$4.53 to \$4.57 per bushel. Minneapolis flaxseed advanced 15 cents at \$6.25 per bushel with renewed buying interest but sunflower seed prices fell 55 to 75 cents at \$9.25 per hundred pounds delivered Duluth or Minneapolis with lack of storage space limiting buying interest.

WEEKLY
SUMMARY
AND
STATISTICS

November 28, 1975

WHEAT AND FEED GRAIN MARKETS STRONGER

In spite of light trading volume in wheat and feed grain markets, prices turned stronger across the Nation during the week ended November 26. Tight farm holding and continued adverse weather in Russian grain producing states contributed strength and heavy selling of grain in the futures pits the past two weeks put many commercial firms back in the market and futures prices spiraled upward with cash grain markets moving along with or above the futures gain as traders improved basis for wheat and feed grains in an effort to pull stock off farms. The winter wheat area of the U.S. and Russia received some snow cover during the week.

Kansas City hard winter wheat advanced 16 to 20 cents with ordinary protein at \$3.64 and 13 percent at \$4.10 per bushel as mills competed with exporters for the light offerings. Chicago soft red winter advanced 16 cents at \$3.48 and Toledo soft white wheat 20 cents higher at \$3.31 per bushel.

Portland soft white wheat went up 13 cents at \$3.76 with hard winter ordinary protein up 13 cents at \$3.91 and dark northern spring 14 percent up 12 cents at \$4.84 per bushel.

Minneapolis dark northern spring wheat moved 9 to 30 cents higher with ordinary protein up 30 cents at \$3.61 to \$3.63 and 14 percent at \$4.39 to \$4.41 per bushel. Medium milling quality hard amber durum went down 5 cents at \$4.85 to \$5.15 with mills the only buyer. Rye dropped 10 cents at \$2.85 in light trade.

Chicago No. 2 yellow corn advanced 13 to 14 cents at \$2.70 to \$2.73 as light arrivals failed to satisfy buying interest. Export and feeder demand improved. Kansas City No. 2 white corn held at \$2.70 per bushel in light trade. Chicago No. 2 heavy oats advanced 4 cents at \$1.60 with improved buying from eastern users and arrivals of new oats light.

Minneapolis best malting barley 70 percent or better plump traded unchanged to 10 cents lower at \$3.30 to \$3.75 per bushel but feed grade barley went up 10 cents at \$2.30 per bushel. Los Angeles western barley moved 7 to 8 cents higher at \$2.74 to \$2.76 per bushel.

Kansas City sorghum moved 20 cents higher at \$4.42 per hundred pounds with the local market following the export bid at the Gulf. Texas High Plains sorghum up 20 cents at \$4.40 to \$4.45 per hundred pounds.

Chicago No. 1 yellow soybeans traded 21 cents higher at \$4.83 and Illinois crusher point prices moved 22 to 26 cents higher at \$4.75 to \$4.83 per bushel as exporters and crushers competed for the light offerings. Minneapolis flaxseed gained 20 cents at \$6.45 per bushel while sunflower seed traded unchanged at \$9.25 per hundred pounds at Minneapolis and Duluth.

AGRICULTURE HIGHLIGHTS

FOR WEEK OF NOVEMBER 17-23

Major winter storm with blizzard conditions stopped most farming activity in its path, storm caused light to moderate livestock losses and placed great stress on animals not in confinement. Snow added much needed moisture to winter wheat in previously dry areas. Nationwide corn for grain was 98 percent. Harvested and soybeans advanced to 91 percent. Winter wheat seeding was 96 percent complete.

SMALL GRAINS:

Rain and snow provided much needed moisture to small grains over Great Plains. Seeding of winter wheat was 96 percent finished normally seeding is virtually complete in most states.

Winter wheat received beneficial moisture, Kansas where 1976 crop is short and not well rooted. Greenbugs were active in some areas prior to snowstorm. In Texas only a few fields remain to be seeded and recent moisture on high and low plains boosted dryland wheat prospects. Winter wheat in Oklahoma was 82 percent up to stand much behind last year's 98 percent.

Moisture was beneficial in Colorado. Nebraska wheat condition was poor to mostly fair and high winds left little or no snow cover on some fields. Moisture in wheat fields was good. Washington and stands are excellent.

CORN:

1975 corn for grain harvest in the final stages with the Nation's corn harvest 98 percent finished versus 86 percent in 1974 and the usual 84 percent.

In the North Central states harvest was virtually complete and far ahead of 85 percent last year and average 83 percent. Most states in this region were either finished or in the windup stage. Progress in Indiana and Michigan furthest behind at 95 percent finished still far ahead of both 1974 and normal levels.

Corn harvesting continues to make excellent progress in the South where over 90 percent has been picked in both the South Atlantic and the South Central States. Harvest ranges from 83 percent finished in Tennessee to complete in the South Carolina and Texas areas.

SOYBEANS:

Soybean harvesting was virtually complete in most Northern states and gaining momentum in Southern states where earlier freezes helped improved conditions. Nation's soybean crop was harvested ahead of both 88 percent in 1974 and the average 85 percent. In North Central states soybean harvesting was finished or virtually complete in all states except Missouri where 97 percent has been harvested versus only 77 percent a year ago. Southern soybean harvesting advanced 14 points to 78 percent complete surpassing 75 percent in 1974 and average 71 percent. Harvest ranged from only 50 percent done in South Carolina to 97 percent finished in Texas combining was 79 percent complete Mississippi 80 percent Tennessee 89 percent Arkansas and 93 percent in Louisiana.

SORGHUM:

Sorghum grain combining was 99 percent finished in seven major states versus 82 percent in 1974 and normal 90 percent harvest was 88 percent done Oklahoma and either complete or virtually complete in all other major states.

PASTURES AND LIVESTOCK:

Blizzard conditions and snow drifts caused extra stress to livestock in storm areas. Death losses were minimal in most states but heavy in some localized situations. Stockmen increased supplemental feeding in many areas where snow cover and frost slowed pasture and range growth, in Oklahoma moisture improved outlook for grazing small grains. Texas stands are short but livestock continue to move into fields.

WEEKLY
SUMMARY
AND
STATISTICS

December 5, 1975

WHEAT AND FEED GRAIN MARKETS MOSTLY HIGHER

Wheat and Feed grain markets moved mostly higher across the Nation during the week ended December 4. Main strength stemmed from the report that Russian grain crop is now estimated to total only 137 million metric tons, sharply under previous reports, the last of which reported 160 million metric tons. Additional strength came from the soybean complex, where considerable export sales business was reported by trade sources with oil sales to Iran the late week feature. Farmer holding of wheat and feed grains was consistent until the Thursday morning sharp rise in prices brought farmer selling into activity until subsequent hedging of grain in futures pits took away much of the early morning gain. New crop condition improved in the U.S. winter wheat area where considerable moisture fell and mild temperatures encouraged growth of the new wheat crop. Illinois made good progress in picking up corn stored on the ground and reported about half the corn is now in storage or moved to market out of piles that had been stored in the open.

Kansas City hard winter wheat trade was dull most of the period until the closing day when sharp futures advance and improved premium basis caused a flurry of farmer selling. Subsequent hedging on the Kansas City futures market rolled prices back to near the Wednesday close but fair amounts of wheat traded during the session. Hard winter ordinary protein closed 4 cents higher at \$3.68 with 13 percent protein up 2 cents at \$4.12 per bushel. Chicago No. 2 soft red winter went up 2 cents at \$3.50 and Toledo soft white wheat advanced 10 cents at \$3.41 per bushel.

Portland soft white wheat closed 10 cents higher at \$3.86, hard winter ordinary protein moved up 10 cents at \$4.01 and dark northern spring 14 percent protein wheat traded 12 cents higher at \$4.96 per bushel.

Minneapolis spring wheat traded mixed as the barge season closed and lake shipping neared the shut off time. Ordinary protein finished up 5 cents at \$3.66 to \$3.68 but 14 percent protein fell 3 cents at \$4.36 to \$4.38 and medium milling quality hard amber durum traded unchanged to 10 cents lower at \$4.85 to \$5.05 per bushel. Rye, with no buying interest, went down 20 cents at \$2.65 per bushel.

Corn traded mixed as lack of trading momentum kept the market searching for direction. Country selling very slow and buying interest mounting, especially in forward months. Buying basis shifted to Chicago March futures. Chicago No. 2 yellow corn closed mixed, down 1 cent to up 1 cent at \$2.69 to \$2.74 per bushel. Kansas City white corn moved up 2 cents at \$2.72 per bushel in dull trade. Chicago No. 2 oats traded up 1 cent at \$1.61 with main buying interest by Minneapolis mills.

Minneapolis best malting barley traded lower under pressure of heavy arrivals and competition from lower cost Canadian offerings. The 70 percent or better plump kinds fell 15 to 30 cents at \$3.00 to \$3.60 per bushel and feed barley dropped 15 cents at \$2.15 as buyer interest slowed.

Sorghum markets firmed with most interest in movement to the ports for export. Kansas City market advanced 10 cents at \$4.52 and Texas High Plains price rose 5 to 10 cents at \$4.50 per hundred pounds. Chicago No. 1 yellow soybeans gained 3 cents at \$4.86 with the oil and meal export business improving and tight farmer holding adding strength. Illinois crusher plant prices went up 4 to 5 cents at \$4.79 to \$4.88 per bushel and Minneapolis flaxseed went up 10 cents at \$6.55 per bushel. Sunflower seed traded 75 cents per hundred pounds higher at \$10.00 delivered at Minneapolis or Duluth.

AGRICULTURE HIGHLIGHTS

FOR THE WEEK OF NOVEMBER 24-30

Storms and subnormal temperatures limited farm activities over much of the Nation. Harvest of 1975 corn for grain was virtually complete much ahead of normal 89 percent. During the period soybean combining reached 95 percent complete nationwide versus an average 90 percent. Snow cover provided good protection to winter wheat in several northern states. Winter wheat seeding was nearing completion in remaining states.

SMALL GRAINS:

Rain and snow continued to supply much needed moisture to fall sown small grains in the Great Plains. Snow cover provided good protection from subnormal temperatures in several states. Seeding of 1976 crop was finished or in windup stages in most states.

Topsoil moisture was adequate in Kansas except in some Southwestern counties warmer temperatures are now needed to improve wheat stands. Wheat seeding was nearly complete in Oklahoma late seedings are slow to emerge because of cold soil temperature. Cold weather should halt further insect damage. Wheat growth improved in Texas High and Low Plains additional moisture needed. Greenbug control measures were necessary in the Low Plains.

Snow cover or added moisture improved prospects in most other major states during the week. Winter wheat was in good to excellent condition in Illinois, Indiana, and Ohio only fair in Nebraska. Soil moisture was excellent for winter wheat in Washington and stands are thriving.

CORN:

Harvest of remaining corn acreage was hampered by rain and snow in several states. However, harvest of Nation's 1975 crop was virtually complete 30 versus 91 percent in 1974 and an average 89 percent.

Harvest was wrapped up in most areas of North Central States compared to only 90 percent in 1974 and normal 88 percent. Stormy weather and very little sunshine in Indiana limited harvest activity and completion of corn picking.

Corn harvesting was on schedule at 95 percent complete in south. However, rainy weather hampered harvesting in South Central States and in most South Atlantic States. Corn picking was behind last years pace in Alabama, Georgia and North Carolina. Harvest ranges from complete in several states to only 88 percent finished in Alabama.

SOYBEANS:

Soybean growers in the Southern States made good use of limited work week in most areas and combining made excellent advancement. Harvest of Nation's soybean crop was 95 percent complete slightly ahead of last years 93 percent and the normal 90 percent.

Harvest was complete in most North Central States and 86 percent finished in the Southern States ahead of 82 percent in 1974 and the usual 80 percent. Arkansas's harvest was 94 percent complete against only 77 percent in 1974. Mississippi combining was 85 percent done versus 79 percent year ago. Harvest ranged from 65 percent complete in North Carolina to virtually complete in Texas. Combining continues to lag last years progress in all of South Atlantic States remains ahead of most South Central States.

SORGHUM:

Combining was virtually complete in all major states except Oklahoma where harvest was 91 percent finished versus 71 percent in 1974 and an average 82 percent. Only few unharvested fields remain in Texas Low Plains with some fall stands in south Texas.

PASTURES AND LIVESTOCK:

Snow and subnormal temperatures increased need for further supplemental feeding and made care of livestock more difficult. Livestock in most states are going into winter in good condition since pastures or crop residues in most areas were adequate. Winter grazing prospects improved in the Texas Plains and Southwest Oklahoma. Livestock continue to graze in most Eastern States.

WEEKLY
SUMMARY
AND
STATISTICS

December 12, 1975

WHEAT AND FEED GRAINS MOVE LOWER IN LIGHT TRADE

Wheat and feed grain markets moved lower across the Nation during the week ended December 11. Farmers held tightly and most buying interest was in grain to move to parts for export. Price depressing factors were the lack of a firm shipping agreement with Russia on grain to be moved after the year end and the fact that Poland asked for delay in shipment of some purchases while cancelling other orders. Canada and Australia took some grain business during the week. Flour mills bid actively for wheat to replace grind but found few offers. Exporters increased bid basis for quick shipment wheat but showed only light interest in feed grains. A warming trend coupled with scattered rain melted most of the snow cover over the winter wheat belt, but the crop is reported in mostly fair to good condition. Feeding interest centered around concentrate feeds to supplement home grown grain but with some pickup in complete feeds as livestock markets showed improvement at the close.

Kansas City hard winter wheat traded lower with ordinary protein down 13 cents at \$3.55 and 13 percent fell 6 cents at \$4.06 per bushel. Chicago soft red winter wheat went down 12 cents at \$3.38 with little buying interest. Toledo soft white wheat declined 13 cents at \$3.28 per bushel.

Portland soft white wheat traded 8 cents lower at \$3.78 as Japan bought wheat from Australia this week. Hard winter ordinary fell 5 cents at \$3.96 and No. 1 dark northern spring 14 percent protein 19 cents lower at \$4.77 as the lake shipping season ended.

Minneapolis dark northern spring wheat traded 15-17 cents lower with ordinary protein at \$3.50 to \$3.52 and 14 percent protein at \$4.20 to \$4.22 per bushel. Medium milling quality hard amber durum wheat dropped 30-35 cents at \$4.55 to \$4.70 per bushel. No. 2 rye held at \$2.65 per bushel.

Yellow corn markets went down in spite of light offerings as processors had covered nearby needs, exporters were not pressing for supply and the feed industry found enough corn coming out of second hands to cover requirements. Chicago No. 2 yellow corn fell 14-19 cents at \$2.55 per bushel in box cars or hopper cars. Kansas City No. 2 white corn held at \$2.72 per bushel in light trade. Chicago No. 2 oats eased 3 cents lower at \$1.58 per bushel as demand eased when the lake shipping season closed for the winter.

Minneapolis best malting barley, 70 percent or better plump traded unchanged to 15 cents higher at \$3.15 to \$3.60 after last week's heavy receipts were absorbed by the trade. Feed grade barley went up 15 cents at \$2.30 per bushel.

Kansas City yellow sorghum went down 17 cents at \$4.35 per hundred pounds with little feed demand and the export bid leading the market lower. Texas High Plains sorghum price fell 10-15 cents at \$4.35 to \$4.40 in thin trade.

Chicago No. 1 yellow soybeans declined 24 cents at \$4.62 per bushel as oil and meal prices declined and adequate supplies of soybeans are available to cover nearby crush and export needs. Country selling remains near a blank. Illinois crusher plant prices went down 23-24 cents at \$4.55 to \$4.65 and Minneapolis flaxseed fell 30 cents at \$6.25 per bushel. Sunflower seed markets dropped 25 cents at \$9.75 per hundred pounds delivered to Duluth or Minneapolis.

December 19, 1975

GRAIN PRICES MOSTLY LOWER

No. 2 yellow sorghum in Kansas City lost 5 cents at \$4.30 and Texas High Plains down 5 to 10 cents at \$4.30 per cwt with limited feedlot demand. No. 1 yellow soybeans at Illinois point declined 14 to 15 cents at \$4.41 to \$4.50 per bushel in spite of the tight farm holding. No. 1 flaxseed in Minneapolis at \$5.85 per bushel which is 40 cents under a week ago with little or no mill demand for immediate delivery. Sunflower seeds held steady in Minneapolis at \$9.25 per cwt.

INDEX OF FEATURES 1975

Features Included Every Week	Page	Monthly Features
Market Highlights	1	<u>U.S. Imports and Exports</u>Jan. 3;Feb. 7;Mar.14; Apr.4; May 2;June 6;July 3; Sept. 12;Oct.3;Nov. 7;Dec.5
Grains: Closing prices for future deliver	2	
Grains: Export prices basis prompt or 30-day shipment f.o.b. vessel.....	2	<u>Inspections</u>
Soybean prices compared with market value of oil and meal	2	Wheat: Inspections for export by classes, programs, coastal areas and country of destination.... Jan. 10;Feb. 14;Mar. 14; Apr. 11; May 16;Jun. 12; special report; June 20;Jul. 11;Jul. 25; Aug. 15 Sept. 12;Oct. 10;Nov. 14;Dec.12;
Cash grain closing prices at the principal markets ...	3	Grains: Inspections for export by ports and areas.... Jan. 10;Jan. 31;Feb. 14; Mar. 14; Apr. 11;May 16;Jun. 12; special report; Jun. 20; Jul. 11; Aug. 8; Aug. 15;Sep. 12;Sep. 26; Oct. 10;Nov. 14;Dec. 12
Wheat: Exports for major countries	4	Oats, barley, rye, flaxseed July 25
Grain: Inspections for export.....	4	SoybeansMar. 14;Oct. 10; Apr. 25;
Soybeans: Inspections for export, weekly	4	CornApr. 11;Apr. 25;May 2;Oct. 10; Nov. 7;
Wheat: Inspections for export by classes and areas ..	4	SorghumApr. 11; Oct. 10; Nov. 7.
Outstanding export sales of grain, rice soybeans, soybean and cottonseed meal	5	
Grains: Inspections for export by coastal areas and country of destination	6	

Prices:	Features Included as Available	1975 Date of Issues
Grains: Average monthly prices at specified terminals:		July 25;
Wheat, oats, barley, rye, flaxseed		July 25; Aug. 21
Wheat export prices and payment rates		Oct. 10
Soybeans		Oct. 10
Corn and sorghum.....		

<u>Wheat and products: U.S. exports by month:</u>	
U.S. grains; Exports by country of destination from U.S. and Canada	Jan. 31; Aug. 8
Corn and sorghum	May 2; Nov.7
Wheat and Flour World Productions	Feb. 7;
Wheat and Flour: World Exports	Feb. 7;
Wheat and Flour: World Imports	Feb. 7;
Coarse Grains: World Export and Imports	Feb. 7; Apr. 18
Coarse Grains: World Productions.....	Feb. 7; Apr. 18

<u>Stocks and Distribution:</u>	
U.S. Grains: Stocks and movements from Canadian ports	Jan. 31 Feb. 28; Apr. 11; May 2; May 30; Jul. 11; Aug. 8; Sep. 26 Oct. 3; Nov. 14;
U.S. Grains: Stocks by positions.	Jan. 31; May 9; Aug. 1; Oct. 31;
Winter Wheat: Estimated production by states	Jan. 10; Apr. 11;
Capacity and utilization of warehouses under uniform grain storage agreements	May 2;

<u>Price Support Activity</u>	
Grains: Price support loan activity	Jan. 17; Feb. 21; Mar. 21; Apr. 18; May 16; June 20; Jul. 18 Aug. 15; Sep. 19; Oct. 17; Nov. 14; Dec. 12
Grains: CCC-owned stocks	Feb. 21; Mar. 14; Apr. 11, May 16; July. 25; Aug. 15; Sep. 12; Oct. 17;
Oats and Barley CCC-owned stocks by position by states	Jan. 17;
Wheat: CCC-stocks by class and states	Jan. 17;

<u>Miscellaneous:</u>	
Prospective planting	Mar. 28;
Summary of fats and oils situation	Apr. 4;
Winter Wheat: Estimated production by states	Jan. 10; Apr. 11;
Agriculture supply and demand estimates	Jan. 31;
Summary of Wheat Situations	May 23; Aug. 1;
National Agricultural Highlight.....	Mar. 21; Apr. 4; May 9; Jun. 6; Aug. 1; Aug. 8; Aug. 15; Sept. 12; Sep. 19; Oct. 3; Nov. 7; Nov. 28; Dec. 5;
Rotterdam Grain Prices	Apr. 18; June 6; Sep. 26; Oct. 3;
White Corn, Corn and Soybean prospective plantings.	Apr. 11;
World Crop Information	Apr. 11;
Australian Wheat Exports	Jan. 31; Apr. 4; Apr. 18; May 9;
Special Report ...U.S. Grains and Wheat	July 1975
Export of Soybean Meal and Beans by country of destination from Brazil ..	May 9;
World Weather Situation	June 6;
U.S.S.R. Grain crop estimate revised downward	July 11;
Imports of Wheat, Oats, Barley, Corn, and Rye for seed under the Federal Act 1959-1975	Aug. 8
Weekly Roundup of World Production and trade	Aug. 15; Sep. 26;
1976 Feed grain, wheat, Upland cotton program provisions	Aug. 21;
Wheat, Flour and Wheat production, U.S. export by months	Aug. 21;
Census Bureau reports on oilseed crushings for August 1975	Oct. 3;
Wheat classes, marketing year supply and disappearance 1972-75	Dec. 5;
